**SCHEME FOR COMPENSATORY AFFORESTATION OVER 48.00 HA. OF DEGRADED FOREST LAND IN MAHULPADA RF OF KULIPOSH RANGE** IN **BONAI FOREST DIVISION AGAINST MINING PROJECT** OF **TODA IRON MINES (ML-139)** OF M/S STEEL AUTHORITY OF INDIA LTD

# SCHEME FOR COMPENSATORY AFFORESTATION OVER 48.0 HA. OF DEGRADED FOREST LAND IN MAHULPADA RF OF KULIPOSH RANGE IN BONAI FOREST DIVISION AGAINST MINING PROJECT OF TODA IRON MINES (ML-139) OF M/s STEEL AUTHORITY OF INDIA LTD.

#### 1. INTRODUCTION:

In accordance with Section-2 of the Forest Conservation Act, 1980, M/s Steel Authority of India Ltd. (SAIL) have submitted diversion proposal for diversion of 25.981 ha. of forest land (including 2.460 ha. of Safety Zone) in M.L.-139 for Mining & allied activities, for which twice the degraded forest land is required for Compensatory Afforestation. Thus, 47.042 ha. of degraded forest land (23.521 ha. x 2 time) is required for Compensatory Afforestation.

Accordingly, degraded forest land over an area of 48.00 ha. has been selected in Mahulpada R.F. of Kuliposh Range. ANR Plantation @500 nos. of seedlings per Ha. at a spacing of 2.5 Mt. X 2.5 Mt. will be taken up over the said identified area of 48.00. The cost estimate for 500 Plants per ha. in ANR mode enclosed as **Annexure-I.** 

#### 2. <u>IDENTIFICATION OF THE DEGRADED FOREST AREA:</u>

An area of 48.00 ha. of degraded forest land has been identified in Mahulpada RF of Kuliposh Range of Bonai Division for taking up Compensatory Afforestation. Mahulpada RF comes under Rehabilitation Working Circle as per the Working Plan of Bonai Forest Division. The location map is enclosed as **Annexure-VI**. The area has been inspected by the Range Officer, Kuliposh Range and found to be suitable for Compensatory Afforestation, and free from encroachment & encumbrances. Certificate to this effect furnished by the Range Officer, Kuliposh Range. Further the identified area has been verified with the help of Decision Support System (DSS) & found suitable for Compensatory Afforestation.

The Certificate on DSS analysis report in the prescribed format is enclosed as **Annexure-V**.

#### 3. TOPOGRAPHY AND SOIL:

The forest land identified for this purpose is Hilly, approx. 15 degree in slope, gravel and soil mixed patch. The area experiences tropical climate with monsoon rainfall.

#### 4. CLIMATE

The area experiences Sub-tropical climate. It is characterized by very hot summer and cool winter. Maximum temperature during summer rises upto 44° Celsius and the minimum goes down to 8° Celsius. The area gets rain from South-East Monsoon, which breaks during second fortnight of June and continues upto last week of September. The annual rainfall varies from 780 to 1880mm. The annual average rainfall is 1500mm. The bulk of precipitation occurs during July-August. During April-May, occasional rainfall occurs along with thunder storm.

#### 5. EXISTING VEGETATION.

The vegetation of degraded forest land identified for raising Compensatory Afforestation in Mahulpada RF comprises of Sal, Kathasiali, Dhaura etc.

#### 6. OBJECTIVE OF THE SCHEME:

- i) To restock the barren forest land by planting suitable species.
- ii) To improve the micro-edaphic conditions by undertaking suitable soil and moisture conservation measures.
- iii) To protect the area against encroachment, illicit felling, fire occurrence, grazing etc., so as to check further degradation of the area.
- iv) To provide gainful employment to the local people mainly involving SC/ST population.
- v) To create awareness among the local villagers on protection and maintenance of plantation and forest.

#### 7. PROPOSED TECHNIQUE:

To achieve the above objectives, it has been proposed to take up ANR with gap Plantation @ 500 seedlings per hectare at a spacing of 2.5 mtr x 2.5 mtr in Mahulpada RF of Kuliposh Range. The said plantation work shall be undertaken in the first year, followed by maintenance during 2<sup>nd</sup>, 3<sup>rd</sup>, 4<sup>th</sup> 5<sup>th</sup>, 6<sup>th</sup>, 7<sup>th</sup>, 8<sup>th</sup>, 9<sup>th</sup>, & 10<sup>th</sup> year. The detailed expenditure statement per hectare is enclosed as **Annexure-I**.

#### (A). SURVEY AND DEMARCATION:

The area is surveyed and demarcated in the field with the help of G.P.S. The GPS co-ordinates of the boundary of the site are mentioned in the Map enclosed as (Annexure-VII). RCC Pillars of usual size will be posted along the boundary line. This operation will be helpful in future maintenance and management.

# (B). REGENERATION CLEANING AND TENDING OPERATION:

The operation aims at tending the existing crop silviculturally for better growth. It involves removal of inferior and diseased tree growth. During this operation, climbers etc which interferes with the growth of the existing crop are to be cut. This operation helps sapling to grow better and faster. The site clearance is to be done by cutting and removal of Eupatorium and all other unwanted growth.

The following operation will be carried out during the operation.

- i) Cutting back of individual inferior poles interfering with the growth of better ones.
- ii) Cutting back of malformed and diseased individuals.
- iii) Singling of coppice shoots & retaining healthier ones.
- iv) Cutting of climbers.
- v) Cutting back of high stumps flush to the ground.
- vi) Pruning the branches of the poles up to hand reach.

During 1<sup>st</sup> year operation, climber cutting, high stump cutting, and cutting of shrub, herbs, malformed and diseased plants will be done. In the next two years, cutting of individuals and singling of economically important species will be done.

#### (C). PLANTATION:

The area will be stocked by way of raising plantation in ANR with gap Plantation. Taking in to consideration the soil condition, the local habitation and suitability of the site, the following species are selected.

- 1. Dalbergia latifolia (Sisoo)
- 2. Pongamia pinnata (Karanja)
- 3. Emblica officinalis (Amla)
- 4. Terminalia belerica (Bahada)
- 5. Terminalia chebula (Harida)
- 6. Acacia catechu (Khair)
- 7. Gmeline arborea (Gambhari)
- 8. Mangifere indica (Mango)
- 9. Artocarpus heterophyllus (Panas)
- 10.Limonia acidissina (Kaitha)
- 11. Syzygium cumini (Jamu)

The following operations will be taken up for plantation;

#### i) Raising of nursery:

Seedlings required for plantation shall be raised in a temporary nursery nearer to the planting site and water sources. Nursery work will be started 18 months prior to the year of plantation so that quality seedling stock will be available for plantation. The seedlings shall be raised 10% extra besides the actual requirement to compensate the casualties. Seedlings will be raised in polythene bags of 9" x 5" size following standard nursery practice.

ii) Alignment and pitting:

Alignment and pitting will be taken up in the month of March-April, Pits of size 45cm x 45cm x 45cm will be dug maintaining a spacing of 2.5mtr x 2.5mtr @500 seedlings per ha. It is proposed to take up Plantation in the blank patches.

#### iii) Actual Planting:

The seedlings will be planted @500 seedlings per ha. in the dug out pits of size 45cm x 45cm x 45cm with a spacing of 2.5mtr x 2.5mtr. Plantation shall be taken up after first regular shower of monsoon and completed by the end of July. Species will be planted as per suitability of the soil condition. NPK/ Bio fertilizer @50gms per plant shall be applied as basal dosage. Anti-termite insecticide shall also be applied to each pit while planting. Casualties if any noticed shall be replaced with the excess seedlings raised for the purpose. During second year also, casualty replacement will be done for which seedlings shall be raised.

#### iv) Weeding, Soil working & manuring:

For establishment and better growth of the planted seedlings, timely weeding, soil working and manuring are necessary. It is proposed to carry out two weedings, soil working and manuring during the first year and second year of plantation and one weeding and soil working during third year. During first year and second year, first weeding and manuring shall be carried out during August-September and the second one during October-November along with soil working. First weeding shall be around the plants and the second will be of strip weeding. The weeding of third year will be around the plants, which will be carried out during August.

After each weeding, soil working will be done around each plant at a radius of 0.5mtr, and manuring of each plant will be done @50grms of NPK/ Bio fertilizer per plant in ring form.

#### v) Application of insecticides:

After planting of good healthy seedlings, the plantation site may cause influx of insects, which usually eat and damage the tender leaves and shoots of the plants. To get rid of such insect attack, application of insecticides will be taken up in required doses at desired intervals. Spraying of insecticides shall be done preferably in a sunny day in the forenoon as per requirement.

#### vi) Fire line tracing and maintenance:

Fire causes heavy loss to the forest & plantation during fire season. To prevent incidence of fire, the area shall be divided in to suitable blocks by tracing fire lines. Boundaries of the plantation patches and these block lines will be scrapped of the growth to a width of 2.0mtr during February-March and the cut back materials and the dry leaves stacked along these lines will be burnt under strict supervision. This operation shall be carried out for three years.

#### 8. SOIL CONSERVATION MEASURES:

The site selected for Compensatory Afforestation is degraded Reserve Forest, undulating, and gullies have been formed due to erosion. So, Soil Conservation Measures like Staggered Trench, Percolation Pit, Contour Trench, Graded earthen bund, LBCD, Wire mesh LBCD, Sub surface Dyke and WHS as per site requirement have been proposed. The cost norm of SMC is enclosed as Annexure-III.

#### 9. FENCING:

To protect the ANR plantation from biotic interference, Bamboo Twigs & Thorns fencing is proposed over the identified area of 48.00 ha. in Mahulpada RF of Kuliposh Range. The total perimeter of the said identified area is 4133 RMT (Or, 4.133 Km) length of boundary.

The cost norm for Bamboo Twigs & Thorns fencing is enclosed as Annexure-II.

#### 10. WATERING:

Watering of the plantation will be carried out aided by solar system with Borewell (1 system for 5 ha. plantation) fitted with Drip system. The cost norm is furnished as **Annexure-IV**.

#### 11. MOTIVATION OF PEOPLE:

As per Govt. resolution of 1993 and 2011, the villagers of the adjoining village, i.e. Tasada village is to be involved in protection and management of plantation. Before execution of the work, a meeting will be conducted in the above villages and resolution regarding support to plantation activities will be made. To motivate the people in this direction, they will be provided with incentives in shape of different community articles, buildings, and different community amenities of fixed and movable type through entry point activities (EPA). Health camps shall also be organized in the villages.

#### 12. EXECUTING AGENCY:

The Divisional Forest Officer, Bonai Division shall execute the work by involving the local VSS mentioned above.

#### 13. INSPECTION, MONITORING & EVALUATION:

In order to make the Afforestation under this Compensatory Afforestation Scheme successful, intensive inspection of the plantation by the Forest field staff and the Officers at the Divisional level is necessary. Moreover, frequent monitoring and evaluation shall have to be done at different stages.

#### 14. REQUIREMENT OF FUNDS:

For implementation of all prescriptions outlined above ₹ 2,49,15,500/(Rupees Two Crore Forty Nine Lakh Fifteen Thousand five hundred) only will be required as detailed below.

	A AND With 500 all 1		
	1. ANR with 500 plants per ha over 48.00 ha. @ ₹1,42,904/-	₹	68,59,392.00
	2. Bamboo twig fencing over 48.00 ha. @₹1,04,966/- per	₹	50,38,368.00
	hectare.		00,00,000.00

Note:

- Priority must be given to the indigenous local species available nearby to the site of plantation.

  10 % indigenous fruit hearing trees must be preferred to Plantation.

  Site specific Soil conservation work like LHCD, Gully Plugging, Staggered Trench, Contour Trench, Graded Bund, etc. may be taken up Chain link fencing can be adopted in the CA plantation taken up outside the forest area and Bamboo twigs fencing may be preferred to CA plantations Watering facilities for procurement of water & watering may be adopted as per the availability of water.

  The Cost Norm of various items can be changed with the approval of the concerned RCCFs keeping the overall cost norm fixed for each Financial Year 1 2 3 4 5

# OFFICE OF THE FOREST RANGE OFFICER, KULIPOSH RANGE

Memo No. 988 KP / Date. 05.11.2021

То

Divisional Forest Officer , Bonai Division,Bonai

Sub:

Proposal for diversion of 25.981 ha. of Reserve Forest land in Toda R.F. for mining of Iron Ore in ML No. 139 (A & B) under Bonai Forest Division by SAIL in 1st RML.

Ref:-

Your memo no 7752/6F-(Mg.) Dt. 05.10.2021.

Sir,

With reference to the above subject cited Memo, I would like to report you that M/s Steel Authority of India Limited has applied for diversion of 25.981 ha of forest land.

In this context I verified one area over 48 ha. area comes under Mahulpada RF which is suitable for ANR Plantation.

SI. No	Condition/Quarry	Reply
1	Name of the degraded forest land and Compartment	Mahulpada RF.
2	Certificate regarding boundary description of the area along with GPS reading from pillar to pillar.	Attached in Annexure-I.
3	RCC Pillars should be posted around the demarcated area, and pillars should be numbered at	The area demarcated but not posted RCC Pillar as the area has not Finalized.
4	the cost of User Agency.  Density of vegetation with reference to existing forest growth, and name of the species available.	The density of Forest 2 to 3 and available of species, Kathasiali, Dhaura, Sal etc.
5	Suitability of the area for raising of plantation under Compensatory afforestation	Suitable for ANR Plantation. C 500/0 Ha.
6	Suitability of the site from Management point of view.	The site is suitable for management site.
7	Whether the area is free from encroachment and encumbrances, and not included under FRA'2006.	The area is free from encroachment and not include in FRA'2006.
8	That the area has not been allotted previously for any other Project.	
9	GPS Map, Treatment Map, and Photograph of the sites are to be enclosed.	
10	Length of boundary for fencing in each case.	The length of Boundary is 4.13 K.M. (4133 Mtrs.)
11	Topography and soil of the identified area.	Hilly, Approx. 15 degree in slope, Gravel and soil mixed patch.
12	Name of the adjoining villages in the indentified area in each case.	
13	The name of Working Circle should be mentioned as per Working Plan of Bonai Division.	
14	A Masonry Sign Board should be fixed at the site to facilitate easy identification of the area during execution.	Masonary signed board to be fixed after Finalization of sites.

This is for favor of your kind information and necessary action.

Yours faithfully

Forest Range Officer
Kuliposh Range

Kuthoosh
