FORM-A

Form for seeking prior approval under section 2 for the proposals by the state Government and other authorities...

To be filled by the user agency

1.	<p>Project details</p> <p>i. Short narrative of the proposal and project/scheme for which the forest land is required.</p>	<p>Himachal Pradesh Power Transmission Corporation Limited (HPPTCL) is a state Government undertaking, operating in intra-state &amp; Inter-state regions of Himachal Pradesh. HPPTCL is responsible for transmission of bulk power supply on EHV transmission network and providing uninterrupted and quality power to the state.</p> <p>Kala Amb is situated about 20 K.M from Tehsil and District head quarter, Nahan. At present Kala Amb is an emerging area for industrial as it hosts various production units for Metals, Papers, Thread Mills and Pharmaceutical etc.</p> <p>The area of District Sirmour especially 132/33/11 kV sub-station Kala Amb and Paonta Sahib are being fed from 220/132 kV Sub-station Giri Nagar which is further being fed from 220 kV D/C Khodri-Majri line and 02 nos. of Single Circuits of Giri-Solan line. The voltage profile of 132 kV Giri-Solan</p>
----	--	--

line is very poor and sometimes it comes to 100 kV during heavy loaded hours as these lines are being fed from PGCIL Jalandhar supply through 220/132 KV Sub-stations at Hamirpur, Kangoo, Kunihar and then to Solan & Girinagar. Although the voltage profile of 220 KV supply is satisfactory, but it is a radial feeder and in case of failure, almost area of District Sirmour faces load shedding and black outs as power from 132 KV Giri-Solan line doesn't meet the complete demand of the area and moreover voltage profile drops drastically.

Himachal Pradesh Power Transmission Corporation Limited (HPPTCL) is constructing Multi Circuit Transmission line from Proposed 220/132/33 kV HPPTCL Substation at Andheri to Tower No. 20/21 of 132 kV Jamta-Kala Amb Transmission Line in Tehsil Nahan Distt. Sirmaur (H.P).

Construction of this line and Sub-station will provide bulk supply from PGCIL Sub-station to HPPTCL Sub-station Andheri and it will be easier to supply reliable power to the areas of District Sirmour. Moreover approximately 18240 men days shall be generated during construction of the project and about 30 persons will get employment.

Keeping above in view, it is proposed to construct of 132 kV Multi Circuit Transmission line from Proposed 220/132/33 kV HPPTCL Substation at Andheri to Tower No. 20/21 of 132 kV Jamta-Kala Amb Transmission Line as second source and to supply better

		voltage profile to all the consumers.
	ii. Map showing the required forest land, boundary if adjoining forest in a 1:50000 scale map	The counter map on 1:50000 scale showing the required area, boundary of adjoining forest is attached.
	iii. Cost of the project	The total cost the project has estimated to Rs. <b>39,19,29,077/-</b> only
	iv. Justification for locating the project in forest area.	This is to certify that the alignment of subject cited project line passing through Mohal Andheri, Trilokpur, Salani, Ambwala-Sainwala, Maholiya Khatola, & Bogariyah under Patwar circle Trilokpur, Monginand & Nahan-3 is to connect the 132 kV Multi Circuit Transmission line from Proposed 220/132/33 kV HPPTCL Substation at Andheri to Tower No. 20/21 of 132 kV Jamta-Kala Amb Transmission Line in Tehsil Nahan Distt. Sirmaur (H.P). Although every effort made to use the non forest area, but due to the geographic conditions and non availability of non forest area along the proposed alignment, forest area has to be proposed, which is unavoidable. It is also mentioned that out of 30.40 Ha. Land required under the subject cited project, only 17.84 Hectare proposed in forest land to cross the forest strips in order to reach in non forest land of adjacent villages.
	v. Cost benefits analysis( to be attached)	Attached
	vi. Employment likely to be generated	Approximately 18240 man days of employment will be generated directly.
2.	Purpose-wise break up for the total land required.	Total land required for the construction of this line Total area 30.40 Hectare Forest area= 17.84 Hectare

		Non-forest area=12.56 Hectare
3.	Detail of displacement of people due to project, if any i. Number of families ii. Number of scheduled castes/scheduled Tribes families iii. Rehabilitation Plan ( to be attached)	No displacement of the people is involved.  Not applicable  Not applicable
4.	Whether clearance under the Environment (protection) Act. 1986 IS required(Yes/NO)	Not applicable
5.	Undertaking to be the cost of raising and maintenance of compensatory afforestation and/ or penal compensatory afforestation as well as cost for protection and regeneration of safety Zone, etc. as per the scheme prepared by the state Government(undertaking to be enclosed)	Undertaking attached

#### BRIEF NOTE

Himachal Pradesh Power Transmission Corporation Limited (HPPTCL) is a state Government undertaking, operating in intra-state & Inter-state regions of Himachal Pradesh. HPPTCL is responsible for transmission of bulk power supply on EHV transmission network and providing uninterrupted and quality power to the state.

Kala Amb is situated about 20 K.M from Tehsil and District head quarter, Nahan. At present Kala Amb is an emerging area for industrial as it hosts various production units for Metals, Papers, Thread Mills and Pharmaceutical etc.

The area of District Sirmour especially 132/33/11 kV sub-station Kala Amb and Paonta Sahib are being fed from 220/132 kV Sub-station Giri Nagar which is further being fed from 220 kV D/C Khodri-Majri line and 02 nos. of Single Circuits of Giri-Solan line. The voltage profile of 132 kV Giri-Solan line is very poor and sometimes it comes to 100 kV during heavy loaded hours as these lines are being fed from PGCIL Jalandhar supply through 220/132 KV Sub-stations at Hamirpur, Kangoo, Kunihar and then to Solan & Girinagar. Although the voltage profile of 220 KV supply is satisfactory, but it is a radial feeder and in case of failure, almost area of District Sirmour faces load shedding and black outs as power from 132 KV Giri-Solan line doesn't meet the complete demand of the area and moreover voltage profile drops drastically.

Himachal Pradesh Power Transmission Corporation Limited (HPPTCL) is constructing Multi Circuit Transmission line from Proposed 220/132/33 kV HPPTCL Substation at Andheri to Tower No. 20/21 of 132 kV Jamta-Kala Amb Transmission Line in Tehsil Nahan Distt. Sirmaur (H.P.).

Construction of this line and Sub-station will provide bulk supply from PGCIL Sub-station to HPPTCL Sub-station Andheri and it will be easier to supply reliable power to the areas of District Sirmour. Moreover approximately 18240 men days shall be generated during construction of the project and about 30 persons will get employment. **(Detail of beneficiary habitation enclosed as Checklist No. 4(a).**

Keeping above in view, it is proposed to construct of 132 kV Multi Circuit Transmission line from Proposed 220/132/33 HPPTCL Substation at Andheri to Tower No. 20/21 of 132 kV Jamta-Kala Amb Transmission Line as second source and to supply better voltage profile to all the consumers.

### JOINT INSPECTION REPORT

We the undersigned have jointly inspected the Forest/Non-Forest area falling under Nahan Tehsil, proposed for the diversion in favour of Senior Manager (Projects), HPPTCL, PIU Kala-Amb, Tehsil Nahan, District Sirmour (H.P.) for the "Construction of 132 kV Multi Circuit line on 220 kV towers from 220/132 kV Sub-station at Andheri to Tower No. 20 of existing 132 kV Jamta-Kala Amb line and stringing & sagging of Panther conductor on 2<sup>nd</sup> circuit of 132 kV Jamta-Kala Amb line on 132 kV D/C towers from T-1 (Devni) to T-14 (Kala Amb)" on 20.04.2022.

This project has been proposed for creating power supply infrastructure to facilitate the industrial area Kala- Amb and other parts of District Sirmour which requires 30.3975 Hectare of land in Tehsil Nahan. The Right of Way (ROW) taken for the Transmission line is 35 meters.

The construction of this proposed transmission line requires 6.6755 Hectare of Forest land, 11.1619 Hectare of Private land with classification as 'Nakabil Jungle Jhari' and 12.5601 Hectare of Private non-forest land in tehsil Nahan. The detail of forest and Government land is enclosed herewith.

The Joint inspection team has examined all the alternatives with the view to avoid/ minimize the use of forest land and user agency has not violated the provision of Forest Conservation Act, 1980 and no work has been started without proper sanction.

The proposal is specifically recommended in the interest of public and minimum use of the forest land is taken into consideration. Therefore the committee has come to the conclusion that the forest land involved is minimum requirement of the proposed project and so is absolutely essential.

## Existing Guidelines for Estimating benefits of Forest Diversion in CBA.

Sr. No.	Parameters	Remarks
1	Increase in production attribute to the specific project.	With the construction of 132 kV MCT line from 220/132/33 KV HPPTCL Sub-station Andheri to Tower No. 20-21 of 132 kV Jamta-Kala Amb Transmission line an approximate 200 MVA of power gets added in the system and accordingly present & futuristic demands of the industrial/domestic consumers will be met which will proportionately increase the production as well.
2	Benefits to economy due to specific project.	Rs 349.16 Lakhs will be annual financial benefit with the increase in power available, there will be an increase in the production of existing as well as upcoming industrial units which will further provide direct and indirect employment and influence economical growth of the state.
3	No. of population benefit due to specific project.	As per detailed note attached at check list Sr. No 4.
4	Economic benefits due to direct and indirect employment due to the project.	Approximately 18240 men days shall be generated during construction of the project and about 20 persons will get regular employment, thus, assuming total economic benefit can be estimate to Rs. 91,20,000
5	Economic benefits due to compensatory afforestation.	The proposed diversion of Forest land is 17.84 ha. The land shall be brought under CA. The Economic benefit due to the compensatory afforestation worked out as per schedule of plantation programme.
	Total financial benefit of the project	349.16+ 91.20=440.36 Lakhs

Thus assuming project life 50 years, total benefit will be =22,018 Lakhs

Total cost of forest diversion =450.306 Lakhs

Benefit / cost ratio =48.89

added that the compensation proposal of M/s GE T&D was checked & evaluated based upon the IEEMA indices and the submitted proposal

of M/s GE T&D amounting to INR 8,09,29,490/- was corrected to INR 5,94,21,310/-. Thereafter, various round of discussions, M/s GE T&D agreed for a compensation of INR 3.25 Crore against their submitted proposal of INR 8.09 Crore in view of the fact that both the parties are equally responsible for execution of substation till completion and thus the inflated cost during the period between Jan. 2020 to Feb. 2021 should be borne by both the parties rationally. **Certificate Regarding Muck Management Plan**

The towers are located in Hilly Terrain. The tower foundation and its related revetment works are planned based on the topographical and techno-economical requirements so that minimum cutting/excavation & revetment works are required and cutting/excavated quantity of earth are fully utilized within the tower bench.

In the case of "Construction of 132 kV MCT line on 220 kV towers from 220/132/33 kV Substation Andheri to tower no. 20/21 of existing 132 kV Jamta-Kalaamb transmission line", the quantity of the cutting/excavated & filling is worked out as per the design drawings and site-specific requirements wherein total 176.35 cum (or 4.3 cum per Tower) (which is only 0.75 % of the total excavated quantity) becomes surplus after filling. (Details enclosed at **Annex-'A'**)

It is further mentioned that the geological strata of the site are generally comprises of soil and boulders of different sizes. Generally excavated material contains 20-40% of usable boulders/stones which are used for revetment work. After excavation, the boulder extracted from the site are stacked and used for the construction of revetments works. So in the instant case, 7064 cum (or 30%) excavated earth shall be in the shape of usable stone which would be used for revetment work. As such the estimated surplus earth shall be fully consumed within the tower site.

However, even if any minor earth material becomes surplus same is used and spread on the overall tower bench as a levelling course with proper compaction.

Net Surplus Earth to be Disposed off			176.35	

## NOTES:-

1) NET SURPLUS EARTH TO BE DISPOSED OFF = 176.35 cum approx. i.e., 4.3 cum/ per. tower.

2) At most of tower locations, out of total earth filling as computed above, 20 to 40 % of stone/ boulders other than soil likely to be found during excavation which will be used in revetment work and as a filter media behind the revetment wall.

3) Since earth filling is a combination of soil and stone/ boulders , but practically earth/ soil is required to be borrowed from other locations for maintaining the tower benches with earth filling.

4) In exceptional cass, if stone/ boulders not found during cutting and excavation then plinth/ height of retaining walls to be increased for consuming surplus earth

Hence, there will be no surplus earth/ Soil for disposing off at each tower location.
