

Tree Translocation scheme (Tree Protection Plan)

1. Brief Summary of Project (NH319A-Mohaniya- Buxar Section KM. 0.000 to KM. 30.660)

Project Detail:- Preparation of Detailed Project Report for Up-gradation & Widening to Two Lane with Paved shoulder from KM. 0.000 to KM. 30.660 of Existing National Highway NH-319A (Mohania-Ramgarh- Chausa- Buxar) in Kaimur district, in the State of Bihar.

The Project Road starting from Mohania (near NH-2) and ends at Buxar (NH-84) (via Ramgarh, chausa) in the state of Bihar. The project road is of significant importance as the road joints two National Highways i.e. NH-84 & NH-2. The road lies in two districts i.e. Kaimur (Bhabua) and Buxar. The length of the road is 65.909 km, divided into two packages i.e. from KM. 0.000 to KM.30.660 & KM.30.660 to KM.65.909 . In case of 1st package the proposed road more or less follows existing road. The road side available land within the existing ROW is declared as forest by the state Govt. The widening of existing Mohania-Buxar road is to be undertaken on the adjoining land to the existing Road.

Figure 1.2: Project Road Stretch shown in Google Image

GPS Co-ordinates (in UTM) of Project Take-off & Terminal Point

Sl No	Project Roads	Length	Traverse Districts	Lat/Long (Starting)	Lat/Long (Ending)

AB

The proposed project confluence with nearly 31 Villages (Table 1) directly or indirectly. The proposed road is passing through three taluka i.e Mohaniya, Ramgarh & Noawan of Kaimur district.. The proposed project starts from from design chainage Km 0+000 at the junction of NH-319 (near NH-02) at village Ghighiya in Mohaniya block and terminates at village Pajarawan of Noawan taluka with design km 30+660 in Kaimur district of Bihar.

BYPASS/REALIGNMENT-

The summary of bypasses with design start and end chainage and length are tabulated in Table.

Bypass- 1:

Start Chainage(Km)	End Chainage (Km)	Length (m)	GPS Co-Ordinate (UTM)	
			Start Point	End Point
Design Ch 0+000 (near NH-02)	Design Ch2+260	2260	44 N, 83°38'20.75"E, 25° 9'58.19"N	44N, 83°37'45.96"E, 25°11'2.50"N

Bypass- 2:

Start Chainage(Km)	End Chainage (Km)	Length (m)	GPS Co-Ordinate (UTM)	
			Start Point	End Point
Design Ch27+480	Design Ch 27+870	390	44N, 83°44'49.11"E, 25°22'12.66"N	44 N, 83°45'1.78"E, 25°22'17.83"N

Bypass- 3:

Start Chainage(Km)	End Chainage (Km)	Length (m)	GPS Co-Ordinate (UTM)	
			Start Point	End Point
Design Ch30+160	Design Ch30+660	500	44N, 83°46'15.13"E, 25°22'48.58"N	44 N, 83°46'33.15"E, 25°22'51.64"N

DETAILS OF AFFECTED TREES:

The entire linear stretch of road side plantations along the highways is declared as protected forests. About nearly 1157 no. of trees are affected within the proposed ROW in district-Kaimur of the entire project section Mohaniya-Buxar. 511 no. of trees are proposed to be translocated and rest trees 646 need to be felled. **List of trees which needs to be translocate are also attached.**

2. Details of Identified Land For Translocation of TreesName of District of Identified Land

:- Kaimur

Location of Identified land for Translocation of Trees:

Mouza- Gheghiya-532,
Darwan-535, Deuria-269 &
Pajarawan -257 in both side of
Proposed Row of Mohaniya-
Buxar section.

Name of Forest Division

:- Bhabhua (Kaimur) Forest Division

No. of Trees for Translocation

:- 511 nos.

Calculation of Identified Land

:-

Required area for translocation of 01 Tree = $3m \times 3m = 9 \text{ sq. Meter}$

Therefore Required Area for translocation of 85 Trees = $09 \times 511 = 4599 \text{ Sq. Meter (0.4599 Hectare)}$

Therefore required length for linear translocation of trees within PROW

= $4599/3 = 1533 \text{ meter}$

Required Length for Translocation of Trees with 3.0 meter width	511*3= 1533 meter
Length would be available for Translocation of Trees:	km 0+000 to km.2+260, km.27+480 to km.27+870, km.30+160 to km.30+660 (Length= 3150 m.) (3.150 km), (Both side length= 6.300km)

Location No.	Start Ch. (design)	End Ch. (design)	Length (M)	Mouza & Thana no.	Available space for Plantation	Number of trees may planted for this space	Total Number of trees may planted for this space	Number of trees will be translocate by this project
Location-1	0+000	2+260	2260	Gheghiya-532, Darwan-535	3 x 2260 m space in both sides.	L.S. 1500	2090	<u>Throughout the existing alignment, only 511nos tree will be translocate</u>
Location-2	27+480	27+870	390	Deuria-269	3 x 390 m space in both sides	L.S. 260		
Location-3	30+160	30+660	500	Pajarawan - 257	3 x 500 m space in both sides	L.S. 330		

Methodology of Trees Translocation

Translocation is the term used to describe the digging and replanting of trees from one location to a new location. Due to the wide extent and morphology of tree root system, translocation of trees usually involves substantial removal of roots.

Design and Documentation

It is ensured that the requirements such as timing of root pruning, size of root ball, translocate and lifting requirement, monitoring and post translocation maintenance, etc. shall be properly planned.

Safety precautions- Tree translocation, like other tree management works, would be conducted in a controlled and safe manner. Workers who shall involve in translocate trees will be given adequate instruction and supervision to ensure that tasks are completed in a safe manner.

Translocation operations

Tools and equipment -All tools and equipment shall be appropriate to the operations and prepared in advance. Digging and root pruning tools shall be sharp and clean in order to cut without breaking, crushing or tearing roots. Mechanical digging and root pruning equipment shall be operated according to manufacturers' recommendations to minimize root damage.

Lifting cables, chains, straps, and/or slings shall be inspected and used according to manufacturers' instructions and specifications.

Preparation of root ball- Root pruning is sometimes required before translocation a tree. Sufficient time shall be allowed between preparation and final lifting for development of new roots capable of sustaining and continuing the growth of the translocated tree.

The root system of a woodland or open-grown tree will normally be widespread. Lifting such trees without initial preparation of a root ball will result in much of the root system being left in the soil. After translocation, the tree crown may then die back, or the tree may not be able to recover and will die eventually.

The root ball size shall varies depending on species, habit, location and specific attributes which shall be as large as practicable to maximize the potential of survival during and after translocation while balancing other logistical and cost concerns.

The root ball sizes would be of a diameter and depth to encompass enough of the root system as necessary for establishment. Normally the diameter of a root ball is larger than its depth which seldom exceeds 1 meter.

Pre-lifting operations -Tree lifting operations shall be carefully timed so as to enable direct delivery to the receptor site. No translocation operations would commence until either the receptor

site or the holding nursery is fully prepared. Tree uplifted must be translocated and watered the same day. Watering before lifting is recommended.

Before uplifting, the outer edge of the previously dug trenches shall be loosened from the surrounding soil, and the root ball can be shaped with taper on the sides, slanting inward toward the base. The first cut around the perimeter of the root ball should be made with a sharp tool. Cuts should be clean to avoid tearing or breaking the roots. The shaping and final cuts should be done by hand.

Temporary support of trees before lifting- A tree after root pruning shall not be having extensive root support during the interim of the translocate process. It may be vulnerable to inclement weather, such as typhoon or heavy rainfall.

Removal of the root system may sometimes aggravate the natural form and balance of a tree and is prone to tree failure. When the stability of a tree is likely to be jeopardized, a temporary support, such as guying or simple prop is essential.

Lifting and handling of root-balled trees - The root ball would be properly wrapped before lifting. Lifting shall be done by direct lift, with padded protection for the tree, using a machine of appropriate capacity connected to the support around the root ball, not to any other part of the trees. Trees shall not be lifted by the trunk as this can cause serious trunk injury but by its root ball which shall be properly prepared and wrapped. Root balls that are not properly protected would easily collapse during transplanting due to its own weight.

Post-planting Care- In case of translocation of trees within the project site amidst the construction activities, they will be well protected with robust fencing.

All newly translocated trees shall receive proper maintenance care in order to facilitate recovery of tree from the translocation shock. It would be ensure the tree shall be stable before its root system is fully recovered to give support.

The stress of a tree shall be observed immediately after translocation or gradually after a period of time. Proper care after transplanting will help to assure survival and minimise stress and ensure a higher successful rate. Maintenance of translocate trees will be in continuation till one year.

- Annexure:-**
1. Summary of Plants which needs to be Translocate
 2. Linear Plan of Identified Land where the plant may translocate (511 Nos.)
 3. Undertaking to bear the amount of translocation and translocation shall be done by User Agency.

STRIP CHART/LINEAR PLAN FOR TRANSLOCATION OF TREES in District-Kaimur in the green strip of the Proposed ROW of Mohaniya- Buxar Road

Left Side	Space for Utility Service	1+500 meter	30 M	Total space available here for 2090 nos tree plantation
	Identified Land For Translocation of Trees	3+000 meter		
	Drain	1+500 meter		
	Protection Land	1+000 meter		
	Embankment Slop (1:2 Ratio)	2+000 meter		
	Earthen Shoulder	1.000 Meter		
	Paved Shoulder	01.500 meter		
Proposed Carriage way		07.000 meter	30 M	Total space available here for 2090 nos tree plantation
Right Side	Paved Shoulder	01.500 meter		
	Earthen Shoulder	1.000 Meter		
	Embankment Slop (1:2 Ratio)	02.000 meter		
	Protection Land	01.000 meter		
	Drain	01.500 meter		
	Identified Land For Translocation of Trees	3+000 meter		
Design Chainage of Identified Land For Translocation of Trees	Space for Utility Service	1+500 meter	30 M	Total space available here for 2090 nos tree plantation
	Location No. 1. (Chainage)	Length= 2260M. 3 x 2260 sqm. space in both sides. L.S. 1500 no. of trees will be planted here.		
	Location No. 2. (Chainage)	Length= 390M. 3 x 390 sqm. space in both sides. L.S. 260 no. of trees will be planted here.		
	Location No. 3. (Chainage)	Length= 500M. 3 x 500 sqm. space in both sides. L.S. 330 no. of trees will be planted here.		
		30+160	27+480	0+000
		30+660	27+870	2+260

Note:

1. Throughout the existing alignment, total 511 no. trees will be translocate to the above mentioned location which will be nearest.
2. We will use minimum forest land for proposed road construction on existing alignment. Maximum portion of existing alignment, 3m. to 6m. forest land will be available outside of proposed ROW. If free forest land available outside of proposed ROW , the tree may translocated to nearest free forest land.

148

148

148

Name of Project for which Forest Land is required : Up-gradation & Widening to Two Lane with Paved shoulder from KM. 0.000 to KM. 30.660 of Existing National Highway NH-319A (Mohania- Ramgarh- Chausa- Buxar) in Kaimur district, in the State of Bihar.

UNDERTAKING TO TRANSLOCATE OF AFFECTED PLANTS

This is to certify that NH Division, Aurangabad, is ensuring that the 511 nos. of affected plants(Which is decided by concerned Forest Department), under Kaimur district, shall be translocated at identified land after stage-I clearance with all safety measures. The affected plants shall be translocate according to a detailed scheme for suitable plan prepared in consultation with the state forest department and the cost for the same shall be borne by User Agency.

User Agency also undertakes to continue to maintain such trees for a period of one year from transplantation.

Place: Aurangabad
