

Annexure-A

For the construction of BG Railway Line between Udaipur-Garjee forest land was diverted and work has been executed. Trial run for introduction of BG Train between Udaipur-Garjee was already been done on 10.03.17 and it is expected that Railway BG Train services in the Udaipur-Garjee section will start from April, 2017 onwards. The existing approach road to the Garjee Station building and Yard is very congested and hence additional land is required for construction of approach road and the area for turning of the vehicle near station building. As this is the land required for approach road and hence, there is no scope for any alternative land.
