

Additional Information

Mozari Kd village is situated in backward area in Barshitakli Tahsil from any development only because of lack of irrigation facility. Many people like myself are able to produce more and quality base crop their yield but there is major problem standing in front of them that is forest land. In village there is tank having good capacity of water storage which can very helpful to the farmer but an obstacle is present called as forest land.

So, if the Forest Department has given permission for laying the private pipe line to cultivate the field which can not harm to the forest like me many of the people can change their bad life in to good life.

Place : Mozari Kd
