Sub: - Forest Proposal seeking Diversion of Forest Land in respect of Karma Stone Mine over an area of 14.17 Ha in Village Karma of Hazaribag District of Jharkhand State of M/s Ram Chandra Mehta Captain Anand Aparna Devi.

Ref – 1. PCCF(Nodal) letter no – 1218 dated 28.12.2017
2 Our earlier submitted letter dated 10.01.2018 & 15.02.2018
3 CF letter no 13E-05-11/2016-346 & 766 dated 06.02.2018 & 19.03.2018
3 Your Letter No – 676 dated 13.02.2018

Sir,

Please refer above said references related to subject cited above. In this regard please find enclosed herewith the item wise compliances as follows.

Query :-

1. समर्पित पृच्छाओं एवं उपलब्ध अभिलेखों की समीक्षा की गई । प्रसंगाधीन पत्र की पृच्छा में माईनिंग प्लान के पृष्ठ संख्या 34 पर दी गई सूचना जिसे नीचे उल्लेखित किया जा रहा यथा Reclamantion at conceptual stage. के संबंध में निम्न बाते कही गई है:- The Mining Lease Area is exists on the ground surface and surface level of the excavated area would be 330 meter after end of life of mine. इसका अर्थ क्या है यह स्पष्ट नहीं हो पा रहा है। इसे स्पष्ट करने हेतु उपयोगकर्ता संस्थान को निर्देश देने की कृपा की जाय ताकि पृच्छा संख्या 2 का स्पष्ट जवाब भेजा जा सके ।

Compliance:-

Refer to the cross section along A-A; & B-B' of approved Progressive Mine closure plan of Karma Stone Mine (enclosed as **Annexure I**) where it indicates that the top Contour/Surface Level of the existing ground is 390 meter in terms of reduce level with respect to Mean Sea Level. Mining shall be done up to a depth of 60 meter from top Contour/Surface Level of 390 meter over a period of 10 years. After end of life of mine, quarry floor level of excavated area would be 330 meter.

Office : Vill. - Bigha, P.O. - Phulwariya, P.S. - Nawalsahi, Dist. - Koderma (Jharkhand) - 825418

Query:-

2. इस प्रकार पृच्छा संख्या 5 के जवाब में कहा जा रहा है कि Ground water table of the proposed Karma Stone Mine is 65 meter depth from the existing surface । इस जवाब में पुनः यह भी कहा जा रहा है की ----- floor level of quarry shall be 330 meter depth at the end of life of mine which is 5 meter up from Ground Water table. वहीं पर Mining Plan के पृष्ठ संख्या 42 के बीन्दू 3(C) में यह कहा जा रहा है कि As the depth of ground water level varies from 65 meter from top contour level and the mining activity will be done above the water table. Hence, it is not for seen any ground water seepage in the mined out area.

यह परस्पर विरोधाभाशी जवाब है । एक तरफ ground water table से उपर खनन करने की बात कही जा रही है, वहीं दुसरी ओर 330 मीटर गहराई तक खनन करने की बात भी कही जा रही है।

Compliance:-

Refer to the same cross section along A-A; & B-B' of approved Progressive Mine closure plan of Karma Stone Mine (enclosed as **Annexure I**) where it indicates that the top Contour/Surface Level of the existing ground is 390 meter in terms of reduce level with respect to Mean Sea Level. Ground water table of the proposed Karma Stone mine is 65 meter depth from the existing surface level i.e top Contour/Surface Level of 390 meter in terms of reduce level with respect to Mean Sea Level. Therefore, Water table is present at a depth of 325 meter reduce level.

Quarry floor level of excavated area will reach at 330 meter reduce level at the end of the life of mine where as Water table is available at a depth of 325 meter reduce level.

Hence, water table will not be encounter during mining.

Therefore, it is herewith requested to kindly recommend the proposal for obtaining Forest Clearance at the earliest.

Thanking You

Yours Faithfully

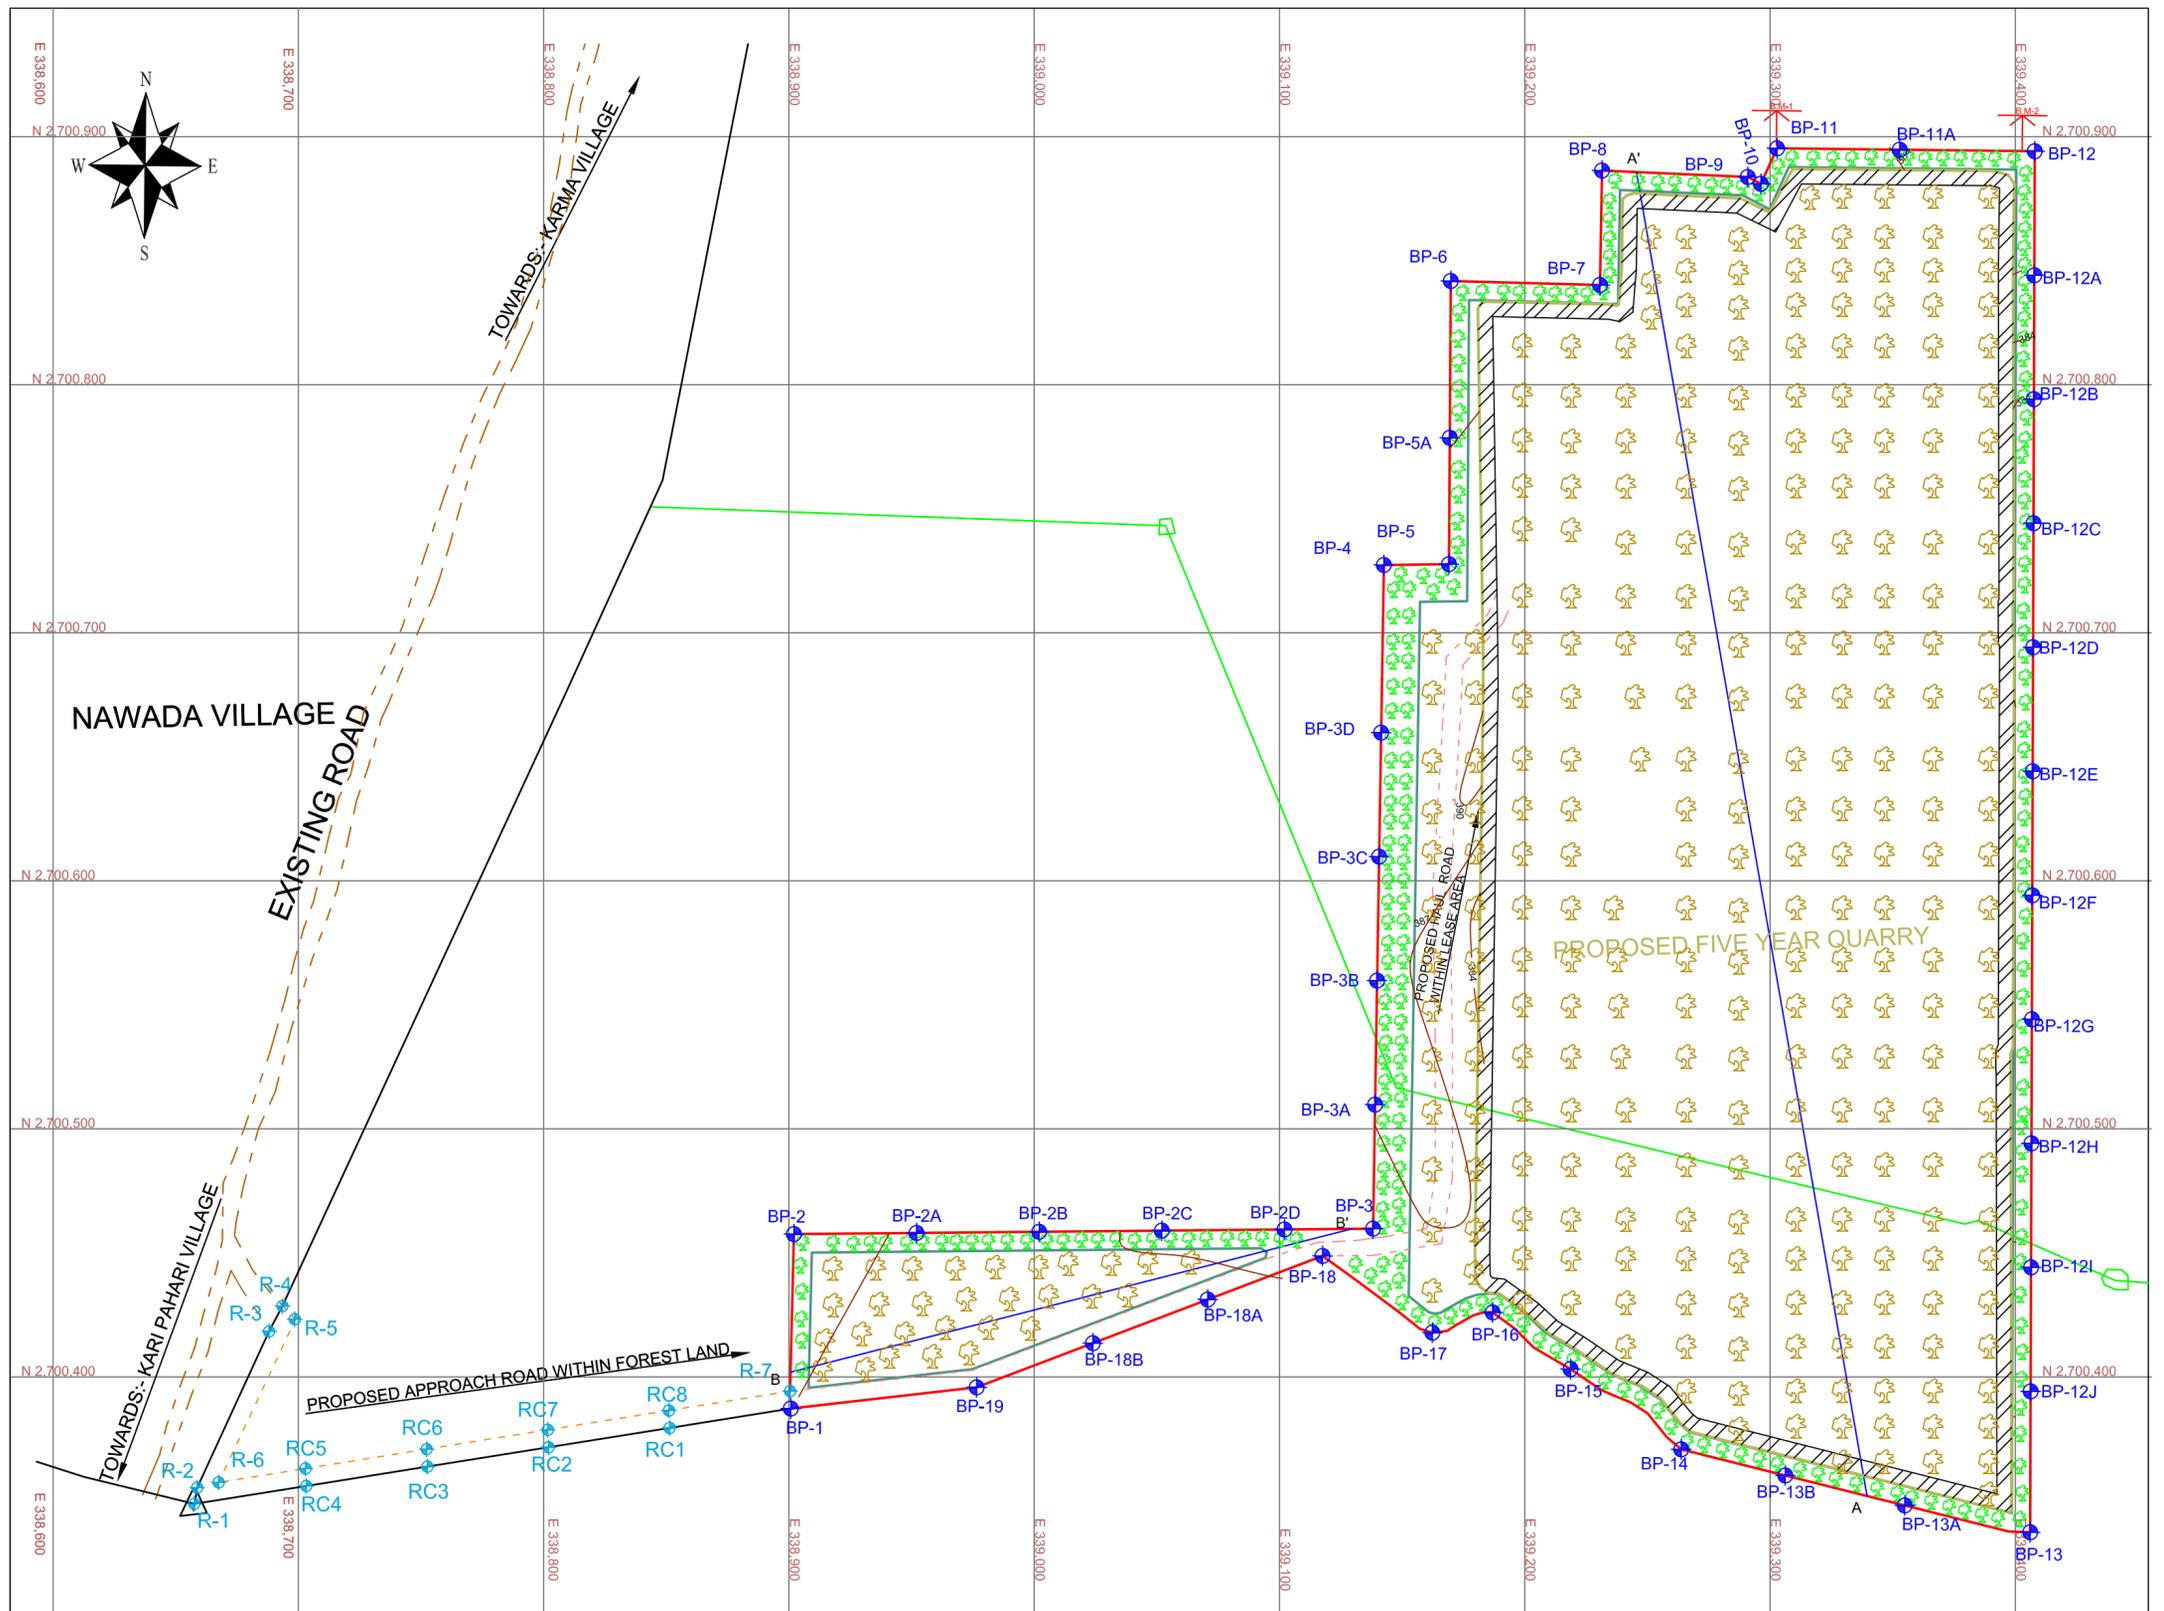

For M/s Ram Chandra Mehta Captain Ananad Aparna Devi

Ramchandra Mehta
