

## NOTE-1

Subject: Alternative examined for the proposed pipeline along with comparative statement shall be submitted.

Girnar water supply scheme is a proposed W.S.S. from Dharagadh Head works (JMC filter plant) to Ambaji Temple route, to provide drinking water to pilgrims throughout a year. This scheme is proposed for pipeline along with Girnar Stairs. In both sides of stair, there is hilly and valley portions. It is very difficult to lay pipeline in this area. There is very less possible area available along with Girnar stairs to carry pipeline works. So there is no alternate route available along stair of Girnar hills.
