Ref: - PO /Amrapali/2022-23/

Date: -

Justification

The application for Diversion of Forest Land is intended for construction of Railway Siding for evacuation of Coal in an Environment friendly manner. It helps in transport of coal to the tune of 20.16 MT Per year without involving the carbon emission. Above system will be operated by electric power, which is almost purest form in respect of Carbon emission. In this way it will help to protect and augment the environmental quality. The alignment has been oriented in such a way that there will be minimum disturbance to the existing eco system. Major portion of the coal extracted from mine will be dispatched from mine through conveyor belt.

Amrapali Railway Siding has been planned in adjacent to Coal mining Project to ensure minimum requirement of land and disturbance to Forest. As such this is the best layout of Amrapali Railway Siding.

Keeping in view the above factors it is proposed to construct the above as soon as possible in the overall interest of national growth.
