

## SITE INSPECTION REPORT NOT BELOW THE RANK OF DCF

(For the Forest Land to be diverted under FCA)

Proposal No : FP/RJ/IND/153357/2022

**Name of Project :** “Laying of railway line for private siding for cement plant proposed area diversion 7.3792 hectare ” Village –Leela parewar & Parewar , District-Jaisalmer(Rajasthan)”

The site inspection of the land involved in the proposal again has been done by me on dated 18-05-2023. On inspection the new alternative route (No.03) and the proposed route inspected. It is found that on the new alternative route( No. 03) 4 sharp corners will come in the railway track. And it is about 1.4 km longer than the proposed route.

In the proposed route the requirement of forest land (oran land) is bearest minimum for the project. The proposed land for diversion (7.3792 ha ) has scanty vegetation bearing only of 24 trees (ker, ber) in 7.3792 ha . It is almost barren land. This land is having almost more than 20 % boulder or rocky strata.

Most importantly proposed land is oran land and it is not under the control of the forest department. At present it is under the jurisdiction of revenue deptt. The land for CA to be provided by the user agency will come under the direct control of forest department. And that will increase the forest area of the department.

Place : **Jaisalmer**

Date : 19.05.2023
