Justification Letter for fixing of alignment

The PMGSY Department has taken up construction work of road from Ganjote to Phalni Part II, Package No JK14-572, Stage Ist, Phase XI, Length = 30.240 KM. The survey work of the road was conducted keeping in view to provide road connectivity to the maximum habitation of the area which are being deprived from the road connectivity for the last more than seven decades and they are still socially, educationally and economically backward. Without road connectivity, the general public of the area is suffering a lot for want of basic amenities. So, the Govt. of India has launched PMGSY to provide road connectivity to the neglected areas.

It is pertinent to mention here that during conducting the survey work and at the time of joint verification with the Forest Department, all the possibilities have been explored to avoid forest land, but in hilly terrain, forest spread over large area and all the compartment through which road alignment is passing are in large areas. So, we cannot shift the road alignment to avoid forest land. The present alignment has been finalized after exploring all the possibilities to avoid forest land and in this alignment, minimum forest is involved and it is a feasible alignment

Hence, justification certificate for fixing of road alignment is issued.

(Er. Roshan Din Chowdhary)
