No. NHAI/PIU-Patna/Ara-Patna-P2/Forest/2024/Vol-I/ 1023

Date: 20.05.2025

To,

The Divisional Forest Officer
 Bhojpur, Bihar

Sub: 4 Laning of Patna-Ara-Sasaram corridor Package2 section 1-Garhani at Ch. Km 73+700 Patar at Ch. Km 84+300 & section2- Greenfield from Sadisopur at Patna ring road (NH-131G) Ch Km 0+000 to Asani at Ch km 35+800, of total length 46+400 km at NH-119A in the state of Bihar on HAM mode: EDS raised by MoEFCC Ranchi on forest proposal 22.716 hec. - Reg.

Ref:- (i) MoEFCC letter no. FP/BR/Road/157384/2022/242 dated 16.04.2025
 (ii) Your office letter no.1233 dt. 02.05.2025.
 (iii) DPR Consultant M/s MSV letter no. C-265 dt. 19.05.2025

Sir,

This has reference to the subject and letter referred above vide which EDS was raised by MoEFCC, RO, Ranchi on the proposal for diversion of 22.716 hec. forest land for construction of 4/6 laning of Patna-Ara-Sasaram section of NH-119A.

2. Further, in compliance to your letter u/r(ii), the documents required is as under:-

Sl.no.	Documents required	Compliance
1	Cost Benefit analysis may be revised.	Annexure-I
2	Certified copy of area calculation by the concerned DFO.	Annexure-II
3	Cross-section layout/map of the road.	Annexure-III
4	High resolution toposheet map of the forest land proposed for diversion & raising CA with latitude & longitude and duly signed by DFO and user Agency.	Annexure-IV
5	As per the chapter-11 para 11.2 of consolidated guidelines and clarifications issued under Van rules, 2023, project proponent needs to upload the map indicating alignment of the entire project, highlighting in the portion passing through forest land, along with salient features of the entire project and details of approval already obtained and sought under the Act for other sections of the project. Hence project proponent is requested to upload KML file of the entire project along with the supporting documents.	Annexure-V

3. In this regard, the requisite documents have been uploaded on the Parivesh portal for your kind perusal and further necessary action please.

Encl: As above

Your's faithfully

 (Arbinda Kumar)
 Project Director

Copy to:-(i)The Regional Officer, NHAI, Patna, Bihar - for kind information
 (ii)Authorised Signatory, DPR Consultant M/s MSV- for information & coordinate with forest dept. to expedite.

COST BENEFITS ANALYSIS

Name of Project: Construction of 4/6 Laning of Arrah-Sasaram-Patna Road section of NH-119A from Km 40+450 (Sakla) to Km 84+300 (Patar) under Bharatmala Pariyojana (Lot-7/Package-2) in the State of Bihar (Package-II).

Nature of Proposal: Diversion of 22.716 hectare of forest land for non- forest purpose for the project “Construction of 4/6 Laning of Arrah-Sasaram-Patna Road section of NH-119A from Km 40+450 (Sakla) to Km 84+300 (Patar) under Bharatmala Pariyojana (Lot-7/Package-2) in the State of Bihar (Package-II).”

Forest Proposal No.: FP/BR/ROAD/157384/2022

Total Length of Project: 43.850 Km

Number of districts involve: 01

Number of forest division involve: 01

S. No.	Division Name	Proposed Forest Area for Diversion (Hectare)
1.	Forest Division Bhojpur	22.716
Total Forest Area for Diversion (Ha)		22.716

Purpose: The cost Benefit Analysis is being undertaken as the required forest land is > 20 hectares for proposed diversion of forest land being affected due to construction of new national highway for above said project.

Guidelines for conducting cost-benefit analysis for projects involving forest diversion:

- 1) While considering proposal for diversion of forest land for non-forestry use, it is essential that ecological and environmental losses and eco economic distress caused to the people who are displaced are weighted against economic and social gains.
- 2) Whenever the forest land is involved in the development projects, the cost of ecosystem services and fragmentation of habitat of wildlife and economic distress caused to the people dependent on forests and the cost of settlement of people dependent on forest should also be added as the cost of forest diversion in addition to the standard project cost which would have been

incurred by the user agencies without involvement of forest land while conducting the cost benefit analysis of the project. Similarly, the benefits from the project accruing due to diversion of forest land and used in the project should also be accounted for in the benefits component in addition to the standard benefits of the project which would have been accrued without involvement of forest land while conducting the cost benefit analysis and determining the benefit and cost ratio (BC ratio).

- 3) The cost of Compensatory afforestation and its maintenance in future and soil & moisture conservation at present discounted value and future benefits from such compensatory forestation accruing over next 50 years monetized and discounted to the present value should be included as cost and benefits respectively of compensatory afforestation while conducting the cost benefit analysis and determining the benefit and cost ratio (BC ratio).
- 4) **Table A** list the details the types of projects involving forest land for which cost benefit analysis will be required, **Table-B** Lists the parameters according to which the cost aspect of forest land diverted for the development projects will be determined, while **Table C** lists the parameters for assessing the benefits accruing to the project using forest land.
- 5) A cost benefits analysis as above should be accompanying the proposals sent to central Government for forest clearance under the Forest Conservation Act.

Table A: Cases under which a Cost -benefit analysis for forest diversion are required

S. No.	Nature of Proposal	Applicable/ Not Applicable	Remarks
1	All Categories of proposal involving forest land up to 20 hectares in plains and up to 5 hectares in hills	Not Applicable	These proposals may be considered a case-to-case basis and value judgments.
2	Proposed for defense installation purpose and oil prospecting only	Not Applicable	In view of national priority accorded to these sectors, the proposal would be critically assessed to help ascertain that the utmost minimum forest land is diverted for non-forest use
3	Habitation, establishment of industrial units, tourist lodge complex and other	Not Applicable	These activities being detrimental in protection and conservation of

	building construction		proposals would be rarely entertained.
4	All other proposal involving forest land more than 20 hectares in plain and more than 5 hectares in hills including roads, transmission line, minor, medium and major irrigation projects, hydro projects, mining activity, railway line, location specific installations like microwave stations, auto repeater centres, TV tower etc.	Applicable	These are cases where a cost benefit analysis is necessary to determine when diverting the forest land to non-forest use in the overall public interest.

Since the proposal is for diversion of forest land measuring more than 20 hectare in plain area for the road project cost benefit analysis report is applicable

Table B: Estimation of Cost of forest diversion

S. No.	Parameters	Given Guideline	Evaluation
1	Ecosystem services loss due to proposed forest diversion	Economic value of loss of ecosystem services due to diversion of forest shall be the Net Present Value (NPV) of the forest land being diverted as prescribed by Central Government (MoEF & CC) Note: In case of National parks, the NPV shall be ten (10) times the normal NPV and in case Wildlife sanctuary the NPV shall be five (5) times the normal NPV or otherwise prescribed by the ministry or any other competent authority	NPV value has been Calculated as Rs 217.57 lakh.
2	Loss of animal husbandry productivity,	To be quantified and expressed in monetary terms or 10% of NPV applicable whichever is	Loss of Animal husbandry due to proposed diversion is

	including loss of fodder	maximum	very, moderate and calculated below. Gross Loss @ 5 ton/Ha/Year @ Rs 100/- per tonne. Therefore, loss of fodder as estimated for about 22.716 Ha. will be $22.716 \times 5 \times 100 \times 100$ Years = Rs 1,135,800/- 10% of NPV = $0.1 \times 217.57 = 21.757$ Lakh. So, considered amount is Rs 21.757 Lakh.
3	Cost of human resettlement	To be quantified and expressed in monetary terms as per approved R & R plan.	NIL human resettlement is required since no family residing in forest land.
4	Loss of public facilities and administrative infrastructure (Roads, buildings School, dispensaries, electric lines, railways etc.) on forest land, or which would require forest land if these facilities were diverted due to the project.	To be quantified and expressed in monetary terms on actual basis at the time of diversion.	No Loss of public Infrastructure and administrative infrastructure (roads, buildings, railways, etc.) on the forest land. All public utilities affected will be shifted by NHAI at cost of Rs 631.65 Lakh.
5	Possession value of forest	30% of environmental cost (NPV) due to loss of forest or	Possession Value of forest land will be

	land diverted	circle rate of adjoining area in the district should be added as a cost component as possession value of forestland whichever is maximum.	(considering 30% of NPV) = $0.3 \times 217.57 = \text{Rs } 65.27 \text{ lakh.}$ Average Per hectare land rate along the project highway in district Bhojpur Rs 33.40 lakh per hectare. So, possession value of forest land (as per average circle rate) = $22.716 \times 33.40 \text{ lakh} = \text{Rs } 758.71 \text{ lakh.}$ So Considered amount (maximum one) is Rs 758.71 lakh.
6	Cost Suffering of oustees to	The social cost of rehabilitation of Oustees (in addition to the cost likely to be incurred in providing residence, occupation and social services as per R & R plan) be worked out as 1.5 times of what oustees should have earned in two years had he not been shifted	Nil as no Resettlement and Rehabilitation is required in forest land. Which is proposed to be diverted.
7	Habitat fragmentation Cost	While the relationship between fragmentation and forest goods and services is complex, for the sake of simplicity the cost due to fragmentation has been pegged at 50% of NPV applicable as a thumb rule.	Habitat fragmentation Cost is 50% of NPV i.e. $0.5 \times 217.57 = \text{Rs } 108.79 \text{ Lakh.}$
8	Compensatory afforestation and soil & moisture conservation cost	The actual cost of compensatory afforestation and soil & moisture conservation and its maintenance in future at present discounted value	Total 45.50 Hectare of degraded forest land proposed for CA in lieu of 22.716 Ha Forest land. Cost of CA is Rs 105.15 lakh.

Table C: Existing Guidelines for estimating benefits of forest land diversion in CBA

S. No.	Parameters	Given Guideline	Evaluation
1	Increase in productivity attributable to the specific project	To be quantified and expressed in monetary terms avoiding double counting	<p>The proposal project for which diversion of forest land is sought is for construction of new national highway. The project road will improve accessibility to the region. This will help in both economic & social development in the region.</p> <p>The project will enable smooth accessibility in the region by which people of the region will be directly benefited. This will accelerate industrialization /commercialization in region and the same will directly generate maximum employment opportunities in these areas and boosting up the economy of the region and state. Again, directly the project will have the potential for employment generation for local people 900000-man days during the construction period. The proposed project does not involve any manufacturing or production. Hence, this section is not applicable. Monetary benefits due to increase in productivity is NIL.</p>
2	Benefits of economy due to the specific project	The incremental economic benefit in monetary terms due to the activities attributed to the specific project.	<p>Economic benefit in terms of increase in trade, saving in vehicular operation and maintenance cost better connectivity, safer journey to commuter and saving of travel time. Improved road connectivity helps in better implementation and management of government schemes. It will provide last and economical transport of goods, after completion of project, the local people and industries situated in the area will be greatly benefited. The construction of project road will provide safe and fast,</p>

			<p>economical and environment friendly transportation to the State, which in term will accelerate the rate of growth in this area.</p> <p>Average Annual Daily Traffic (2023): 13433 Passenger Car Unit.</p> <table border="1"> <thead> <tr> <th>Current Scenario</th><th>Modified Scenario</th></tr> </thead> <tbody> <tr> <td> Present Distance = 75.85 Km Average Fuel Economy = 20 km/litre Total fuel consumption = $75.85/20 = 3.79$ litre </td><td> Distance after construction of new national highway = 43.85 Km Average Fuel Economy = 20 km/litre Total fuel consumption = $43.85/20 = 2.19$ litre </td></tr> <tr> <td></td><td> Fuel saving = $3.79 - 2.19 = 1.60$ litre Average fuel cost = 100 Rupee per litre Fuel saving on 13433 PCU = $1.60 \times 13433 = 21493$ Litre per day approx. Savings (in monetary terms) = $21493 \times 100 = 2149300$ Rupees per day Total benefits in 5 years ($5 \times 365.4 = 1827$ days) $= 1827 \times 2149300 = 3926771100$ = Rs 3926.77 Lakh </td></tr> </tbody> </table>	Current Scenario	Modified Scenario	Present Distance = 75.85 Km Average Fuel Economy = 20 km/litre Total fuel consumption = $75.85/20 = 3.79$ litre	Distance after construction of new national highway = 43.85 Km Average Fuel Economy = 20 km/litre Total fuel consumption = $43.85/20 = 2.19$ litre		Fuel saving = $3.79 - 2.19 = 1.60$ litre Average fuel cost = 100 Rupee per litre Fuel saving on 13433 PCU = $1.60 \times 13433 = 21493$ Litre per day approx. Savings (in monetary terms) = $21493 \times 100 = 2149300$ Rupees per day Total benefits in 5 years ($5 \times 365.4 = 1827$ days) $= 1827 \times 2149300 = 3926771100$ = Rs 3926.77 Lakh
Current Scenario	Modified Scenario								
Present Distance = 75.85 Km Average Fuel Economy = 20 km/litre Total fuel consumption = $75.85/20 = 3.79$ litre	Distance after construction of new national highway = 43.85 Km Average Fuel Economy = 20 km/litre Total fuel consumption = $43.85/20 = 2.19$ litre								
	Fuel saving = $3.79 - 2.19 = 1.60$ litre Average fuel cost = 100 Rupee per litre Fuel saving on 13433 PCU = $1.60 \times 13433 = 21493$ Litre per day approx. Savings (in monetary terms) = $21493 \times 100 = 2149300$ Rupees per day Total benefits in 5 years ($5 \times 365.4 = 1827$ days) $= 1827 \times 2149300 = 3926771100$ = Rs 3926.77 Lakh								
3	Number of populations benefited due to specific project	As per the detailed project report	The project road passes through Bhojpur District (Bihar), which has 27.28 Lakh Population . The entire population of the district and adjoining districts would be benefitted by the project.						
4	Economic benefits due to direct and indirect employment due to the project.	As per the detailed project report	A Total of 900000-man days employment will be generated during construction phase for skilled/unskilled labor. Average wages inclusive of all cost of living is Rs 500 per day. Total financial implication will come out to be = $900000 \times 500 = \text{Rs 4500 Lakh}$						

5	Economic benefits due to Compensatory Afforestation	Benefits from such compensatory forestation accruing over next 50 years monetized and discounted to the present value should be included as benefits of compensatory afforestation. *For benefits of CA the guideline of the ministry for NPV estimation may be considered.	In lieu of total trees to be remove from proposed RoW in forest land along the project road it is proposed to undertake at least twice of affected area as Compensatory afforestation (Forest Conservation Act, 1980). So, the net productivity will increase. The Compensatory Afforestation will be done in 45.50 hectare of degraded forest land. Which is down the line would be having a density of minimum 0.4. The ecological value for a 50 years period for the density of 10 is Rs 126.74 Lakh per hectare. By considering minimum 0.4 density the ecological gain for the project would be $126.74 \times 0.4 \times 45.50 = \text{Rs } 2306.67 \text{ lakh}$
---	---	--	--

Summary of Cost -Benefit Analysis for the Project

S. No.	Loss (in Lakh)	Benefit (Lakh)
1	Ecosystem services losses Rs 217.57 lakhs	Ecology gains for Compensatory Rs 2306.67 lakh
2	Loss of Animal Husbandry Productivity including loss of Fodder = Rs 21.76 Lakhs	900000-man days will be generated assuming Rs 500 per day as wages total benefit = $500 \times 900000 = \text{Rs } 4500 \text{ Lakh}$
3	Loss of Public facility Rs 631.65 Lakhs	Benefits of economy due to the specific project = Rs 3926.77 Lakh
4	Possession Value of Forest Land diverted Rs 758.71 lakh	--
5	Habitat Fragmentation Cost Rs 108.79 Lakh	--
6	Compensatory Afforestation and Soil and Moisture Conservation Rs 105.15 lakh	--
	Total Loss = Rs 1843.63 lakh	Total Benefit Rs 10733.44 Lakh

Benefit Cost Ratio =Total Benefit /Total Loss = Rs 10733.44 Lakh/ Rs 1843.63 lakh = 5.82 which is > 1, so project is found viable based on given/above-described criteria.

Note 1: Net Present Value (NPV) of environment and ecosystem services loss:

The concept of Net Present Value of the forest land diverted is a scientific method of calculating the environment cost and other losses caused due to diversion of forest land for non-forestry purposes. The NPV represents the net value of various ecosystem services and other environment services in monetary terms which the forest would have provided if the forest would not have been diverted.

Note 2: Possession Value of forest land diverted:

The forest land diverted for the project such as irrigation, hydropower, railways, roads, wind, and transmission lines and mining etc. are unlikely to be returned and remains in possession of the user agencies. Therefore 30% of the net present value (NPV) of the forest land diverted or market rate of adjoining area in the district should be added as a cost of component as "possession value of forest land" in addition to the environment costs due to loss of forests.

PROW (Proposed Right Of Way)	Project : Construction of 4/6 Laning of Arrah-Sasaram-Patna road section of NH-119A from Km 00+000 (Sadiopur) to Km 34+800 (Ashani) (Ring Road) under Bharatmala Pariyojana (Lot-7/Package-2) in the State of Bihar (Package-III)			Sheet : 09 OF09

Project Details

Project Name	Construction of 4 laning from saura (sasaram) at Ch. 0+000 to Pattar (at Arraha bypass) at Ch 84+400 of Patna-arraha-sasaram corridor of NH-119A with a SPUR connectivity of 4.3 km with Arraha Mohania (new NH-319) at Asni under Bharatmala Pariyojna in the State of Bihar on HAM Mode
UPC	BR/12345678

1. Project Outline

1.1 Project Title	Construction of 4 laning from saura (sasaram) at Ch. 40+000 to Pattar (at Arraha bypass) at Ch 84+300 of Patna-arraha-sasaram corridor of NH-119A (Package-02)
-------------------	--

i. Salient Features of the project

Sr. no	Description	Details
1	Length	43.850 km (Design Length)
2	Type of pavement (Flexible /Rigid))	Flexible Pavement
3	Major Bridges cum LVUP	2 nos.
4	Minor Bridges cum SVUP	6 nos.
5	Culverts	62 (Box Culverts)
6	Flyover/Grade Separator	4 nos.
7	Viaduct	Nil
8	ROB/RUB	Nil
9	VUP/LVUP/SVUP	05 Nos./6 Nos./7 Nos.
10	Major Junctions	2Nos.
11	Length of Service Road/Slip road	4000 (BHS Length)
12	Toll Plaza	1 No. on MCW +1 no on exit entry
15	Bus shelter	02 No
16	Truck lay Byes	01 Nos.
17	Rest Area	01 Nos.

ii. Total traffic (No. of PCUs) and the Month & year in which traffic survey conducted.	Traffic surveys were conducted in FY 2021-22 13433 PCU		
iii. Main Carriageway	1	No. of lane/Width	Four-lane (Greenfield Alignment) Width of one side: 0.5 m K.S. + 7.00 m MCW + 1.5 m P.S. + 2.0 m E.S.
	2	MSA and CBR of soil for calculating pavement thickness	Main Road-80MSA with 8% effective CBR Slip/Service Road-10 MSA with 8% effective CBR
	3	Pavement Composition Flexible and Reason for not adopting Rigid pavement	Main Road: - BC-40mm, DBM=85mm, WMM=150 & CTSB=215 mm, Subgrade=500mm Rigid Pavement not adopted to restrict the Project cost
	4	Pavement composition for Rigid Pavement (proposed for Toll Plaza including taper portion on both sides)	PQC = 290 mm DLC = 150 mm GSB = 150 mm

iv.	Slip Road and Service Road	Slip Road provided at approaches of VUP, ROB/Flyover and Interchange
a)	Width of Slip/ Service Road (As per NHAI Circular dated 10.01.2016 /2017, it should be 9.0 m wide)	Slip Road=0m Service Road = 7.5 & 5.5 m.
b)	Million Standard Axles (msa) for which designed	Main Road-80MSA with 8% effective CBR Slip/Service Road-10 MSA with 8% effective CBR
c)	Slip/Service Road Pavement (Flexible / Rigid) - Composition and Reason for not adopting rigid pavement.	Slip/Service Road - BC-30mm, DBM=50 mm, WMM=150 & CTSB=200 mm, Subgrade=500mm Rigid Pavement not adopted to restrict the Project cost

2. Outcome & Deliverables

1.1 Stated aims and objectives of the Project	It is observed that SH-12 (Arrah-Sasaram-Section) is heavily congested at locations Grahni, Piro, Bikramganj, Mokar and also at connecting point at Sasaram. The existing road (SH) was mostly having 2-lane carriageway and would not be able to cater to the present and anticipated future traffic which will play on Arrah-Sasaram Section. The existing alignment was needed for rehabilitation and capacity augmentation to Four Laning. Since the proposal of bypasses on the existing stretch was not economically viable that's why separate Four lane green field alignment was necessitated.							
2.2 Indicate year wise outputs/ deliverables for the project in a tabular form.			Year 1		Year 2		Total	
		Components	Physical	Financial	Physical	Financial	Physical	Financial
		The entire project	60%	60%	40%	40%	100%	100%
2.3 Indicate final outcomes for the project in the form of measurable indicators which can be used for impact assessment / evaluation after the project is complete. Baseline data or survey against which such outcomes would be benchmarked should also be mentioned.	Direct benefit accruable from the project cannot be translated into monetary terms. This is a scheme for improvement of infrastructure facility, which will automatically bring socio-economic growth in the region.							

Details of approvals already obtained and/or sought under the Act for other sections of the Project.

S. No.	Name of Project	Forest Proposal No.	Status
