

## **PROJECT NOTE**

We Mr. Dinesh Kollaiah Kargal & family members are the owners of 4.819 Ha. land in G.No. 12 ,26/1/2 & 26/1/3 of village Karade Taluka Shahapur dist. Thane . The land is at about 10 km distance from Shahapur . Presently it's under agricultural use .Though it is within village Karade it is at a distance from Karade gaothan & situated very close to the border of villages Mamnoli & Savroli Bk. There is no existing road within a distance of 2 to 3 km towards Karade gaothan & the area in between is fully covered by agricultural fields . The only available existing road , from where a connectivity to our land can be established , is the Shahapur – Chandroti road .This road is within 500 meters distance from our land. This road passes through villages Savroli Bk & Mamnoli . All the areas between our land & the existing road are forest areas .The Protected forest S. No. 29 of village Karade , Private forest G. No. 213 & 214 of village Savroli and Protected forest S, No. 49 of village Mamnoli are within this tract & there is no non forest area in between the existing road & our lands . Thus forest lands cannot be avoided for construction of approach road to our lands .

As a part of social service , we are proposing Vrudhashram ( Old age home ) & Goshala in our above areas in village Karade . These projects will be operationalized on non-commercial no profit no loss basis . It will be funded through our self-contributions & voluntary donations . The local as well as distant people are expected to benefit from these projects . The number of visitors to our lands is expected to increase once the project is commenced . Also the approach road is essential during the construction period to facilitate movement of material & labor in our areas . As per the norms of Mumbai metropolitan region for development , the minimum width required for Approach road is 10 meters .

### **Proposed Activities**

**Goshala** – Go seva , service to the cows has a place of very high importance since the time of vedas . The cows are referred to as Gomata ( mother ) or Kamdhenu in our Indian culture . Cows play a very important role in conservation of biodiversity , provide resources to natural farming and protection to mother earth . The populations of Deshi local varieties of cows are under pressure & threat of extinction due to advent of hybrid varieties . Providing adequate protection to the deshi varieties of cows is the

need of the day and the main motive of this Goshala project . Milking or non-milking cows which may be stray , abandoned ,old , sick or handicapped will be provided shelter & feed in the Goshala . Efforts will also be made to stabilize & increase the populations of deshi varieties of cows . This project will be funded through family contributions & donations.

**Old age Home** - More & more people from the young generations are getting settled in metropolitan cities or even abroad in pursuance of job opportunities & future prospects . In most of the situations it's not possible for the elderly parents to shift to the new places with their children & settle in totally different environment . Thus they are forced to live a lonely life facing issues of safety & security . Staying in social isolation often causes depression & consequent illness in them . Most of the elderly people have some physical issues . Mental & physical health deteriorates in old age . Nursing , proper care & medical help is utmost essential for such elderly people . Emotional support is also necessary in this age . In recent past , instances of elderly people being robbed ,beaten or murdered have also been noticed . In present times number of children not taking proper care of their elderly parents is increasing rapidly . Thus providing Old age homes to the elderly with adequate safety , security & care is becoming more important in the present social situation. Old age home is proposed in the above lands with security & safety provisions and dedicated nursing & medical team to take care of the elderly . The project will be funded through contributions from the elderly or their children , self-contributions & donations .

Place: Shahapur.
