DETAILED RECLAMATION PLAN

For the Construction of 66KV D/C Transmission line from Pragatinagar to 66/22KV Sub-Station Hulli (Kotkhai) Shimla. (H.P) only 0.1296 Ha of Forest land is required for the tower bases. Land is sloppy and steep at many tower points and earth cutting and excavation is involved. The double circuit 66kV towers have been designed with narrow bases and hill side leg extensions have been incorporated in the design, therefore, all the four legs will not be at the same platform in sloppy lands. This will involve small and moderate excavation/earth cutting. The excavated soil will be back filled and revetment work where required will be provided. No extra soil will be excavated or carried away and no muck will be disposed off in the nearby forest, river/stream, except for the diversion area.
