heights are in metres and above Indian mean sea level. Contours are approximate.

A native height, h_s , represents the approximate height, in metres, between the top and bottom of a slope.

The triangulated heights and contours in this chart have not been adjusted to the heights of the spirit levelling benchmarks and may not be strictly in accordance with them.

Unsettled roads and cart tracks in this chart are generally indicated in dry season.

Lines shown are, in this seasonality, most water from 14.00 to 15.00 hours.
