

## Muck Disposal/Management Plan

The Existing bituminous layer will be milled by machines and collected at plant site as per latest technology of recycling of the milled material, which is regenerated by adding admixture and emulsion. Thus the obtained mix will be reused in the construction of highway. This practice is permissible under the Specification for Highways published by Ministry of Road Transportation and Highways (MORTH).

Hence, the project, State Highway No.-46, from Km. Chainage 0+000 to 82+220 of Pukhrayan-Ghatampur-Bindiki Section in Distt. Kanpur Dehat, Kanpur Nagar and Fatehpur, itself will not produce any muck to be disposed. It is further stated that muck produced is very valuable material and is mixture of grit and bitumen which is not advisable to through it off.
