

Justification of Diversion of the Forest Land for the work NH 744-Annual plan 2015-15 Reconstruction of Muruganpanchal Bridge at Km 76/000

The proposed Bridge area is near Aryankavu. Existing bridge is having 4.2 meters carriage way. This single line Bridge is insufficient to cater the traffic of two lane road. So that to proposed a new bridge with 9 meters span. Due to curved topography and widening purpose obtain forest land for smoothening the curve. This is the matter for diversion of Forestland
