

JUSTIFICATION FOR LOCATING THE PROJECT IN FOREST AREA

The telecom cables are always laid along the road side due to easy, supervision, quick maintenance, and low cost of maintenance. The application does not have to acquired land for this purpose as the road side land belongs to NHAI & PWD in Rajasthan State lying of cable shall be done on a 45 cm. width of surface land, & up to 1.65 meters of depth and near to the extreme road boundary where alignment of trench will be done in such way that no tree will be required to be cut. The laying of telecom transmission cable along roadside is an agreed policy of the application and Ministry of Surface transport.

These optical fibre cable systems will fulfill the needs of telecommunication circuits and wireless broadband services and other data for **The Government, industries, defense and society**. This telecom infrastructure shall lead to growth in Economy hence employment more employment and better living conditions for the geography / state/country.

This new scheme of laying optical fiber cable is most modern and state of art technology in the field of digital telecommunication. Moreover the same cable will provide most of new value added services as well as it will tatter for the needs of integrated services digital network.

The area required for the laying of the optical Fibre Cable is bare minimum which is a part of the Reserved Forest land.
