

Muck Disposal Plan

The pipe line in forest area will be laid over pillars for which, size of dug will be 1.0 x 0.8 x 0.6 Cum. The distance between pillar to pillar will be approximately 6.0 Mtr. and for laying 160 meter pipe line in forest area, there will be approximate 27 pillars have to be constructed for which approximately 12.96 Cum (very less quantity) Muck will be generated and will be easily disposed out of forest boundary.
