Sub: Revised Work programme of Compensatory Afforestation w.r.t for Construction of PMGSY Road from L021-To5 to Papar Abtara PMGSY Road Package No: JK05-158, Stage-II.

Ref: DFO Samba No: DFO/SFD/680-81 dt: 30-04-2021.

ORDER

The work proposal for Compensatory Afforestation to be done in lieu of diversion of 1.34 hectare of Forest land for "FCA proposal No: FP/JK/Road/120591/2021 "Construction of PMGSY Road from L021-TO5 to Papar Abtara PMGSY Road" Package No: JK05-158, Stage-II to the tune of Rs. 4.98/- lacs prepared and submitted by the Divisional Forest Officer, Samba Forest Division is hereby approved/sanctioned as per the details given below:-

Proposal No.		Area involved for diversion	Area of C.A Plan	Canopy Density	Spp. To be planted
FP/JK/Road/120591/2021	8/B	1.34 Ha	2.68 Ha	0.2 %	Shisham, Khair, Bauhinia & Chir etc.

The approval/Sanction is subject to the following conditions:-

- All the terms and conditions as per the provisions of Forest Conservation Act 1980 w.r.t Compensatory Afforestation are complied with.
- 2. That the existing Forest Tariff Rate Schedule shall be applicable.

3. That the DFO Samba Division shall be the implementing agency by executing the CA Plan.

(Samuel Changkija, IFS)
Conservator of Forests,

East Circle, Jammu. dt:-04-05-202 /

RECOMMENDATION

The L021-T05 to Papar Abtara PMGSY Road, which has been proposed to be taken up for construction by PMGSY Division Jammu, is likely to provide connectivity in the remote village of Samba District, which in turn shall certainly play a key role in enhancing service delivery in these rural areas as well as in uplifting the rural economy.

Since there is no substantial loss of biodiversity as well as wildlife due to the construction of this road, therefore, it is recommended that in view of the larger public interest involved herein, the said road may by granted requisite approval under the provisions of the Forest (Conservation) Act, 1980.

Divisional Forest Officer Samba Forest Division Samba

CERTIFICATE FOR SUITABILITY OF AREA FOR COMPENSATORY AFFORESTATION

The area proposed for compensatory afforestation on Degraded Forest Land in lieu of Forest Land diverted under Forest Conservation Act, 1980 for construction of road from L021-T05 to Papar Abtara, has been selected in 01 (one) patch of degraded forest area falling in Forest Compartment No. 08/B Lyani forest of Mohargarh Forest Range. The selected patch for carrying out compensatory afforestation is a degraded forest area with canopy density of <u>0.2</u>. In order to reduce the biotic pressure as well as to improve the biodiversity along with forest cover, this patch is proposed for compensatory afforestation through Artificial Regeneration (AR) and allied activities with suitable local indigenous species like Chir, Shisham, Khair & Bauhinia alongwith grass slips in line with the working plan prescriptions.

Executive Engineer PMGSY Division Jammu.

Tour Note of Site Inspection Report in respect of the PMGSY Road from L021-T05 to Papar Abtara

Today on 10-02-2021, the undersigned along with Range Forest Officer Mohargarh,

Block Forest Officer Mohargarh and Beat Forest Guard Padya beat, visited the road alignment

of L021-T05 to Papar Abtara. The undersigned with the forest team walked along the road

alignment at intervening stretches. The undersigned checked the permanent Bench Marks

(PBMs) placed at different RDs by the User Agency.

The undersigned then made a small detour along the road alignment on both the sides

to get a fair idea about the nature of ground vegetation in order to ascertain whether there are

any endangered or rare flora in the area and no endangered / rare/ unique flora was noticed in the area under observation.

It was also found on enquiry from the field staff that the area proposed for diversion

does not for the habitat of any critically endangered wildlife species. Moreover, the aerial

distance of the nearest wildlife sanctuary (Mansar lake) is approx. 4.77 Km from the projected

area. As such, there is no apprehension of any kind of fragmentation of habitat of any wildlife

The slope of the area proposed for diversion, in general, is gentle to moderate. The user

agency had given written consent that no dumping in the forest is required. However, the user

agency shall have to take strict soil conservation measures during execution of cutting in steep

stretches to avoid the likely damage that may be inflicted upon the forest crop in the area.

Necessary directions in this regard have been issued to the concerned field staff to remain

vigilant during the execution phase and to promptly report any violation, if noticed.
