The ministry of Road Transport & Highways (MoRTH), government of India has decided to take up the development of Section – I – Shahpur Patgaon NH 548 A in the state of Maharashtra for augmentation of capacity for safe and efficient movement of traffic by upgrading to Two Lane with paved shoulder configuration based on the traffic demand.

The existing project road predominantly has a carriage way width 7 meter wide with earthen shoulder 0.5 to 1.5 meter on the both sides with exception in few locations. Paved shoulder are observed at some major build ups along the project stretch. The existing width incapable to cope up with the increasing traffic. Because the highway is declared as National Highway, the project road requires minimum two-lane with paved shoulder configuration.

The total length of the project stretch selected for up-gradation is 20.130 KM in the package from which road is passing through forest area in Shahpur forest division. The proposed widening requires diversion 17.01 Ha. in Shahpur forest division.
