विषय :- वन भूमि के अधिग्रहण के लिये Geo-Co-Ordinate DGPS सर्वेक्षण के संबंध में।

संदर्भ :- क्रमांक/मा.चि./2015/4969 धरमजयगढ़ दिनांक 17/09/2015

महोदय,

उपरोक्त विषयान्तर्गत लेख है कि एसईसीएल के छाल खुली खान (SEAM-III) परियोजना (6MTY) हेतु भूमि अधिग्रहण के तहत ग्राम लात के 176.710 हेक्टेयर संरक्षित वनभूमि एवं ग्राम खेदापाली के 8.307 हेक्टेयर राजस्व वनभूमि (छोटे-बड़े झाड़ का जंगल) का Geo-Co-Ordinate DGPS सर्वेक्षण का कार्य पूर्ण होने की सूचना प्रतिवेदन जो CMPDI द्वारा प्रेषित है एतद् द्वारा संलग्न किया जा रहा है।

यह आपके सादर सूचनार्थ प्रेषित है।

संलग्न :- यथोपरि।

सादर सूचनार्थ :-

महाप्रबंधक, रायगढ़ क्षेत्र।

प्रतिलिपि :-

1. योजना एवं परियोजना अधिकारी, रायगढ़ क्षेत्र।
2. वन एवं पर्यावरण अधिकारी, रायगढ़ क्षेत्र।
3. भू-राजस्व अधिकारी, रायगढ़ क्षेत्र/छाल उपक्षेत्र।

Sub: Preparation of Geo-referenced Boundary Map (in shape file) of Forest Land Chhal OC Expn Seam-III (6MTY) Project, Raigarh Area, SECL.

Ref: SECL/BSP/P&P/H-161 Dated 30/03/2015

Dear Sir,

Please find enclosed herewith the report on preparation of geo-referenced boundary map (in shape file) of forest land for Chhal OC Expn Seam-III (6MTY) Project, Raigarh Area, SECL and a CD containing shape file and kml file.

This report is prepared for use in forest area diversion application only on the basis of surveyed / digitized coordinates of forest area falling in Chhal OC Expn Seam-III (6MTY) Project provided by SECL.

Kindly acknowledge receipt.

धन्यवाद

Report on Preparation of Geo-referenced Boundary Map (in shape file) of Forest Land, Chhal OC Expn Seam-III (6MTY) Project, Raigarh Area, SECL

1.0 Introduction

South Eastern Coalfields Limited (SECL) vide letter number SECL/BSP/FOREST/DGPS/2015/80 dated 03-01-2015, had requested CMPDI to provide geo-referenced boundary map in shape file of forest land falling in Chhal OC Expn Seam-III (6MTY) project. An offer letter No: RV/EXP/2015/DGPS/864 dated 30-03-2015 was sent to SECL for acceptance.

Subsequently, the work has been incorporated in the annual action plan for 2015-2016 vide letter number SECL/BILASPUR/P&P/H-161 dated 30/03/2015. DGPS work carried out in salient points along the forest boundary. Other surveyed coordinates received from colliery authorities of Raigarh Area of SECL vide letter number: SECL/GM/RGH/Envt.&Forest/ 2015/114, dated 01-07-2015 which are included in the annexures of this report (Annexures I, II, III, & IV).

2.0 Background

In India, major percentage of power is being produced by thermal power stations where coal plays a very vital role. With the growing concern for increasing power production, the thrust is on increasing the coal production on coal producing companies, such as SECL.

The coal demand for other industrial and domestic consumption has also increased over the years. The coal producing companies, in general are hard-pressed and they are feeling constraints as many of their mines are reaching the limits of their allotted land.

In order to increase coal production, either the existing mines are to be expanded or new mines are to be opened. Some portion of the coal bearing area is falling in forest areas, for which forest clearance is required so that mining can be done in those areas.

To check irrational exploitation of forest and to maintain the Ecological Balance, Forest (Conservation) Act, 1980 was enacted. Under this act, no forest land can be used for non forestry purpose without the prior approval of central government.

Therefore, all proposals of diversion of such areas to any non-forest purpose can only be permitted by the central government. The procedure for forest clearance envisaged under the act mandates a two stage approval process.

Stage I: In principal approval: Upon a prima facie review the proposal is either accepted or rejected. If approved the project authority is required to deposit an amount for compensation of the opportunity cost of the forest (NPV, compensatory afforestation, additional expenses towards mitigating probable environmental damage etc.)

cmpdi
A Mini Ratna Company

Stage II: Following the deposit of the above mentioned costs, the land is handed over to the project authorities provided they have obtained all other requisite clearances.

The forest boundaries, in general, are marked on cadastral (Khasra) maps. In most cases, the boundaries are demarcated on ground by allottee or project proponent, in collaboration with forest officials. At salient points along the boundary, pillaring/ pegging is also done.

As per the circular of MOEF, one of the pre-requisite for getting clearance of forest land to be diverted is a geo-referenced boundary map in shape file format of the desired forest land.

About 185.017 Ha forest land is falling in the Chhal OC Expn Seam-III (6MTY) project out of which 176.710 Ha is protected forest and 8.307 Ha is in the category of revenue forest (CJJ/BJJ). SECL applied for diversion of forest land to MoEF. The forest land diversion proposal has to be submitted online alongwith geo-referenced boundary in shape file after DGPS survey.

3.0 Location

Chhal OC Expn Seam-III (6MTY) project is located in Raigarh Area of SECL which falls in Raigarh district of Chhattisgarh. Nearest township is Raigarh.

4.0 Scope of Services

The scope of services of CMPDI are defined as providing geographical co-ordinates of forest boundary within the leasehold of Chhal OC Expn Seam-III (6MTY) project and preparation of shape file of the forest land which has been requisitioned.

5.0 Methodology

Execution of the job was planned on the basis of plan of the area provided by the project. For the job, DGPS (Differential Global Positioning System) survey was found to be appropriate for determining geographical co-ordinates of forest boundary.

The Global Positioning System (GPS) is a satellite-based location, timing and navigation system in all weather conditions, anywhere on or near the Earth where there is an unobstructed line of sight to four or more GPS satellites. Presently, 30 orbiting satellites of GPS constellation of USA and 24 GLONASS (*Globalnaya navigatsionnaya sputnikovaya sistema* or Global Navigation Satellite System) satellites of Russia are operational for the purpose of GPS survey.

The Global Positioning System is made up of three parts: satellites orbiting the Earth; control and monitoring stations on Earth; and the GPS receivers owned by users. GPS satellites transmit three types of information: the satellite's number, its position in space, and the time.

These signals are picked up by the GPS receiver on ground. With signals from three or more satellites, a GPS receiver can triangulate its location on the ground (i.e., longitude and latitude) from the known position of the satellites. With four or more satellites, a GPS receiver can determine a 3D position (i.e., latitude, longitude, and elevation).

Differential Global Positioning System (DGPS) refers to using two or more GPS receivers to achieve greater positional accuracy. Basic methods of DGPS survey are Static, Rapid-Static, and Real-time Kinematic (RTK).

For our job, post-processed static survey is found to be most suitable. In static surveys, one GPS receiver is used as base station and other GPS receivers can be used as rover stations. Base receiver is stationed at a point of known co-ordinates for longer duration and the rover stations are kept at unknown stations for comparatively shorter duration. Data from base and rovers are then post-processed in GPS data processing software, LEICA GEO-OFFICE 8.2 version, to achieve sub-centimeter level accuracies, especially in case of dual-frequency GPS receivers, which is in possession of CMPDI.

ArcGIS 10.2 version software was found to be suitable for preparation of shape file of the forest land in WGS-84 co-ordinates.

AUTOCAD 2015 software was used for basic digitization and plotting of data generated.

6.0 Survey Instrument

For providing geographical (spherical) co-ordinates of the stations along the boundary, Differential Global Positioning System (DGPS) consisting of one base receiver and one rover receiver were used. Brief specifications of DGPS are as follows:

A)	Instrument:	
	Make	Leica
	Model	Viva
	Signal	GPS: L1, L2 & L5 carrier, CA, L1 P, L2 P, L2 C GLONASS: L1, L2 & L5 carrier, L1 CA, L2CA, L1P, L2 P GALILEO: E2-L1-E1, E5, E6
	Channels	72
	Accuracy:	
	Post Processed Static DGPS	3mm +0.5ppm horizontal, 5mm + 0.5ppm vertical
	Real Time RTK	10mm + 1 ppm horizontal, 15mm + 1 ppm vertical
	Power:	
	Internal Battery	2 Li-Ion, 3900mAh, 7.2V
	Communication:	
	Bluetooth	Bluetooth standard 1.2
	USB	1.1 Version
B)	Software	i) Inbuilt Leica software for data recording ii) Leica Geo Office for data processing

cmpdi
A Mini Ratna Company

7.0 Details of Field Activity

- Reconnaissance survey was done after reaching the site prior to taking up actual static DGPS work. Officials from Chhal OC Expn Seam-III (6MTY) project mine were associated during reconnaissance and subsequent DGPS static observation work both at base and rover stations.
- DGPS survey was carried out in Chhal OC Expn Seam-III (6MTY) project, in reference to following stations in the table below, whose location on the ground was shown by the project officials.

Station Name	Co-ordinates as provided to CMPDI by SECL		Observed Geographic Co-ordinates (WGS-84)	
	Easting(m)	Northing (m)	Latitude	Longitude
P-24	2909123.98	898139.93	83° 7' 0.884" E	22° 4' 58.292" N
Q-23	2910129.90	899505.35	83° 7' 35.706" E	22° 5' 42.900" N

Q-16	2910224.50	900218.78	83° 7' 38.859" E	22° 6' 6.123" N
Q-1	2910719.53	900327.95	83° 7' 56.115" E	22° 6' 9.770" N
Q-7	2910799.97	900323.14	83° 7' 58.924" E	22° 6' 9.629" N

8.0 Computation

- Data recorded is downloaded from DGPS and processed in computer to get post-processed WGS-84 co-ordinates of the surveyed stations. The co-ordinates of other boundary pillars / pegs are then transformed.
- The geodetic / geographical co-ordinates along forest boundary is tabulated in Table -I.

9.0 Documents Submitted

Following documents are being submitted along with this report:

- Drawing No: RV/EXP/GMT/2015/8
- Soft copy of shape files & kml files in CD.

ANNEXURES

Job No.: 560060

SOUTH EASTERN COALFIELDS LIMITED
BILASPUR

OFFICE OF CHIEF OF FOREST (FOREST DEPARTMENT)

Ref. No.: SECL/BSP/FOREST/DGPS/2015/ 88	Date : 03-01-2015
Dealing Clerk:	Name of Officer: A.S.Bapat

Sub: Invitation of offer for preparation of geo-referenced boundary map (in shape file) of 185.017Ha. Forest Land of Chhal OC, Seam III(6MTY) Project, Chhal Sub Area, Raigarh Area, SECL.

Proposals for diversion of 185.017Ha. forest land for Chhal OC, Seam III(6MTY) Project, Raigarh Area is in the process of getting the forestry clearance. DGPS survey and preparation of shape file of forest boundary is mandatory with the proposal for forestry clearance.

In this connection a request is received from Chhal Sub Area, Raigarh Area vide letter no. SECL/CHHAL-CSA/SAM/14-15/13 dated 02-01-2015 for its proposal of diversion of 185.017Ha. Forest land.

You are requested to submit your offer for carrying out the above said work.

Submitted through the General Manager (P&P), SECL, Bilaspur.

Sub: Preparation of Geo-referenced Boundary Map (in shape file) of Forest Land Chhal OC, SEAM-III(6MTY) Project, Raigarh Area, SECL.
Ref: SECL/BSP/FOREST/DGPS/2015/80 Dated 03/01/2015

Dear Sir,

We shall carry out the subject assignment. The scope of services of CMPDI shall be:-

- DGPS Survey for ascertaining WGS84 Co-ordinates of forest pillars fixed by SECL on ground.
- Preparation of shape file of the forest boundary &
- Preparation of report of co-ordinates of forest pillars (in WGS84) with map.

SECL shall arrange to provide the following "input data / information" for carrying out the subject assignment:-

- Demarcation and fixing of forest boundary pillars on ground and supply of its local / coal-grid co-ordinates with location.

The subject assignment would be completed within 04 (Four) weeks from the 'zero' date. The 'zero' date for this assignment would be from the date of receipt of "input data/information" towards the above work or the date of receipt of work order from SECL, whichever is later.

We shall require 35 (Thirty Five) EDs for carrying out the subject assignment. The ED rate as applicable for that particular financial year (s) in which the EDs are booked shall be charged. In addition, service tax on total consultancy fee and education cess on service tax shall also be payable by client. The current rates of service tax & education cess are 12% & 3% respectively. The estimated ED rate for CIL and its subsidiaries is Rs.17383.00 for FY 2014-15.

We request you to kindly send your acceptance at your earliest convenience to enable us to take up the assignment.

धन्यवाद

भवदीय,

क्षेत्रीय निदेशक

This map is prepared on the basis of survey coordinates provided by GPS and data obtained from ESRI/IGRS datum. Every effort is made to ensure the information depicted is as accurate and correct as possible. However minor errors due to digitization and transformation cannot be ruled out.

This map is prepared for use in obtaining clearance from MEF for division of forest land falling within the mining licensed area. This map may not be used for any other purpose without the written permission of the Coal India Ltd. This map may not be copied without the written permission of the Coal India Ltd. This map is prepared for use in obtaining clearance from MEF for division of forest land falling within
