

Certificate

This is to certify that, the area selected for the above mentioned project is slightly gentle slope and this patch of land has been proposed in the centre of the Jhandutta Town, which is approachable to the people of entire Jhandutta Tehsil.

Although, there is no scope of soil erosion, but if at any stage, it seems that soil erosion possibility is there then the following methodology will be adopted during execution of the said work to stop the soil erosion:-

1. The construction will be done in step methods to stop the soil erosion.
2. It will be ensured that the plantation will be done in setbacks with the consent of Forest Deptt.
3. Vegetation:- the simplest and most natural way of prevention of soil erosion is through planting vegetation. Thus, the soil will be covered with growing grass and planting trees on it.
4. Retaining Wall & Brest Wall:- A retaining wall will block the creep of the soil and slow down the collapse.

Executive Engineer, PWD
Jhandutta, Distt. Bilaspur (HP)

Attested
Sub Divisional Officer (C),
Jhandutta, District Bilaspur (H.P)
