Sir/Madam,

Please refer to above referred letter vide which alternative site for the proposed project is required to be explored. In this regard, it is intimated that the proposed road will take off from the village Jabbal Ka Bag and finally terminate at village Kharkon. The alternative proposal was explored by this department during the visit, which was not found feasible. The grade of the alternative alignment is not adequate and cover more length which comes to 13.500 Km. The alternative route will also pass through Reserve Forest land and also involves more number of trees as compared to the proposed alignment. It is further submitted that the village Kaindiawala Jabbal Ka Bag & Kharkon are the unconnected habitation and no existing road network is providing road access to these villages. The proposed road alignment to connect these villages, which is being provided by the PWD, is absolutely feasible and also shortest. For construction of this road, the minimum forest land as well as trees will be involved. The route is quite unavoidable. The necessary certificate by the Deputy Commissioner of District Sirmaur has already been issued for Non-Availability of Non-Forest land for the proposed project.
