CATEGORY OF PROPOSALS FOR WHICH COST BENEFIT ANALYSIS IS APPLICABLE ANNEXURE VI(A)

Sl. No.	Nature of Proposal	Applicable/Not applicable	Remarks
1	2	3	4
1	All categories of proposals involving forest land up to 2 Ha. in plains and upto 5 Ha. in hills	Applicable	The total area applied for mining lease is 9.88 Ha in a hilly region.
2	Proposals for defence installation purposes and oil (Prospecting only)	Not applicable	
3	Habitation establishment of industrial units tourist lodges/complex and other building construction.	Not applicable	
4.	All other proposals involving forest land more than 2 ha. in plains and more than 5 Ha. in hills including roads, transmission lines, minor medium and major irrigation projects, hydel projects mining activity railway lines location specific installation like Micro wave stations, auto repeater centers, TV towers etc.	An extent of 8.60 Ha for Mining & Dumping purpose, Safety zone – 1.26 Ha and 0.02 Ha for Road formation.

PARAMETERS FOR EVALUTION OF LOSS OF FOREST – ANNEXURE(B)

Sl. No.	Parameters	Roads, Transmission lines of Rly. Lines	Minor irrigation Projects Quarrying of stones/metals	Medium of Major irrigation Hydro electric large mining of other Mic. Projects
1	2	3	4	5
1.	Loss of value of timber, furl wood and minor forest produce on an annual basis including loss of man hours per annum of people who derived livelihood and wages from the harvest of these commodities.		NIL. The Forest growth is only thorny shrub.	
2	Loss of animal husbandry productivity including loss of fodder.		NIL. The Forest growth is only thorny shrub.	
3	Cost of human resettlement		Not applicable, as no resettlement is involved.	
4	Loss of public facilities and administrative infrastructure (Roads, Buildings, railway etc.,) on forest land, or which would require forest land, of these facilities were diverted due to the project.		NIL. No such facilities are existing in the area.	
5	Environment losses (soil erosion effect on Hydrological cycle, wild life habitat, micro-climate upsetting of ecological balance)		There is no environmental loss such as soil erosion, and there is not wild life in the area applied. The area is very small.	
6	Suffering of oustees		Not applicable

PARAMETERS FOR EVALUATION OF BENEFIT NOT WITH STANDING LOSS OF FOREST-ANNEXURE-VI-C

Sl. No.	Parameters	Roads, transmission lines of Rly. Lines	Minor Projects	Irrigation / Hydel Projects and other i.e. mining purpose.
1	2	3	4	5
1.	Increase in productivity attributable to the specific project		The establishment of mining in the area will increase black granite product in the State about 4000 cum per year	
2.	Benefits to economy		Over 20 years period a quantity of 80000 cum could be sold fetching @ Rs.7500/- per cum for Rs.572.00 Lakhs.	
3.	No. of Population benefited.		About 45 families will be benefited / 260 people can live on this.	
4.	Employment potential		150 semi skilled and 80 skilled worker could be employed directly. Other 100 persons will be employed indirectly.	
5.	Cost of acquisition of facility no non-forest land wherever feasible.		Not applicable since the forest lies in the Forest land only.	
6.	Loss of (a) agricultural and (b) animal husbandry production due to diversion of forest land.		Not applicable, since the forest lies in the Forest land only.	
7.	Cost of rehabilitating displaced persons as differ from compensatory amounts given for displacement.		NIL	
8.	Cost of supply of free fuel wood to works residing in or near forest area during the period of construction.		NIL

A TENTATIVE RECLAMATION SCHEME OF QUARRY LEASE AREA APPLIED BY M/S. SRI VASISTA MINING, NANDYAL, KURNOOL District.

1. M/s. Sri Vasista Mining, Nandyal, Kurnool District applied for quarry lease for Black granite of Basavapalle & Chittapara RFs, Chittoor District over an extent of 9.88 Ha for a period of 20 years.
2. Soil erosion measures such as gully plugging, check daming and other afforestation works shall be undertaken under the guidance of Forest Department. The entire mine area of 8.60 Ha reclaimed by filling outside soil into the voids created. Thus retaining the near original landscape.
3. During the lease period the dumps shall be consolidated by sowing hamata grass and constructing the contour bunds below the dump bottom and edge. Avenue plantation shall be undertaken along the road. The dumps will have inverse slope contour benches so that water is retained and no silt is washed off.
4. The estimated cost of reclamation is given as annexure. The cost of reclamation of 1 Ha out to Rs.93,000/- for preparation work, planting and maintenance of seedlings.
5. The total cost of reclamation plan of 8.60 Ha will be Rs.8.674 Lakhs which shall be undertaken by the lease.

Justification

Physiography:

Topographically, the applied area falls in Northern side of the dis-continuous hillocks trending in East-west direction. The hillock relief in applied areas is about 70 to 80 mts. The area covers with thorny bushes and boulders. Boulders and sheet are exposed at places. There are no prominent natural drainage channels in the area.

Geology of the Area:

Geologically, the applied area belongs to peninsular gneissic complex essentially a low grade metamorphic terrain formed during the Archean times and are intruded by late Archean to early Proterozoic mafic dyke swarms. The applied area consists of dolerite dyke striking NW-SE in direction. The width of the dyke is about 120 to 150 mts

and a length of 475 mts. The applied area is covered with small boulders ranging from 1.5 to 04mts underneath by sheet rock. Mineralogically the dolerite consists of plagioclase feldspar and Augite as essential mineral and olivine, chlorite and Quartz as accessory mineral. Petrology of the area constitutes and exhibits wide variation in their external forms, structural patterns with preferential emplacement broadly along East-West direction. At some places, the dyke is swelling and pinching. The unaltered part of plagioclase is cloudly due to minute inclusions of magnetite which is a common feature is dolerite dyke intrusive into granulite terrain. The rock available in that area is hard and compact in structure black in colour. The characteristics colour, Structure, texture, Compactness, Cutting &Polishing strength attains usage the same in cutting and polishing purpose. The above factors are commercially viable and may attract export value. Structurally the rock units are jointed and influence in recovery of dimensional stone.
