2. In this regard, the reply of observation attended by Executive Engineer Nahan HPPWD has reported that no other possible alignment to connect the village Jabbal Ka bag , and finally terminate at village Kharkon . The alternative proposal was explored by this department during the visit which was not found feasible. The grade of the alternative alignment is not adequate and cover more length which comes to 13.500Km. The alternative route will also pass through Reserve Forest Land and also involves more number of trees as compared to the proposed alignment. It is further submitted that the village Jabbal Ka bag , Kandaiwala and Kharkon are the unconnected habitation and no existing road network is providing road access to these villages. The proposed road alignment to connect these villages, which is being provided by the PWD, is absolutely feasible and also shortest for construction of this road; minimum forest land as well as trees will be involved. The route is quite unavoidable.

This is for information and further necessary action please.
