

**JOINT INSPECTION REPORT**

Joint inspection of site for diversion of forest land for c/o link road from Nehra PHC Kainchi to Nagadhar via Growth length of this road is 3.146 km. This road is being constructed by HPPWD to connect the village Nagadhar. The area has a potential to produce good crops of Almonds, Potatoes and other cereal crops, the transportation of which to the markets is a major problem for the local inhabitants in the absence of a road link. Moreover, in case of medical emergencies the absence of road link poses a major problem for evacuations of patients especially in view of the steep and rugged terrain. The road will cater to the needs of population of about 115 and give a boost to the local economy.

Keeping in view of the above, it is not possible to avoid the forest land for construction of this road as the area is surrounded on all sides by forest land. In the alignment of this road 1.5447 ha. of forest land included dumping place and 135 number of various species trees are involved. In these circumstances joint inspection committee is of the view that diversion of this much of forest land cannot be avoided. There is no other alignment feasible to connect the village Bahli with a link due to the geological condition of the area.

The joint inspection committee therefore recommends that the forest land measuring 1.5447 ha. coming in the alignment as per Khasra number wise detail given in Check List No. 6 of the proposal be diverted under Section 3(2) of FRA Act, 2006 for construction of this road.
