

**COST BENEFITS ANALYSIS IN ACCORDANCE WITH  
GOI FC GUIDLINES NO 7- 69/2011-FC DATED 01-08-2017**

**Name of Project:** Improvement and Upgradation of Newly declared National highways in the State of Uttar Pradesh -Stretch from Laksar-Purkaji (On NH-334A)

**Nature of Proposal:** Diversion of 0.9300 ha of forest land for Upgradation of Newly declared National highways in the State of Uttar Pradesh -Stretch from km 0+000 at Khada Chowk (Junction between Delhi-Roorkee road and Purquazi-Laskar Road (MDR 6W) Mukhiya Market in the District of Muzaffarnagar at Purkazi ( On NH-334A) and ends at Km 15.089 district boundary of Uttar Pradesh and Uttarakhand near Aiki Village in the State of Uttar Pradesh. in favor of the Executive Engineer, NH, Division, PWD Uttar Pradesh.

**Total Design Length of the Project Road: 15.089 Kms**

**The proposed road section Purquazi -Laksar -Haridwar)** starts from Khada Chowk (Junction between Delhi-Roorkee road and Purquazi-Laskar Road (MDR 6W) Mukhiya Market in the District of Muzaffarnagar and ends at district boundary of Uttar Pradesh and Uttarakhand. The approximate **length of project road is 15.089 Km.** T

he new NH number of the project section is NH-334A.

**Number of District through which project road traverses- 1 No i.e Muzaffarnagar District**

**Total forest area proposed for diversion: 0.9300 ha**

**Purpose:** The cost Benefit Analysis is being undertaken as the required forest land is > 20 hectre for proposed diversion of forest land being affected due to widening of existing road for above said project.

## **COST BENEFITS ANALYSIS IN ACCORDANCE WITH GOI FC GUIDLINES NO 7- 69/2011-FC DATED 01-08-2017**

### **Guidelines for conducting cost-benefit analysis for projects involving forest diversion**

- (i) While considering proposal for diversion of forest land for non forestry use, it is essential that ecological and environmental losses and eco economic distress caused to the people who are displaced are weighted against economic and social gains.
- (ii) Whenever the forest land is involved in the development projects, the cost of ecosystem services and fragmentation of habitat of wildlife and economic distress caused to the people dependent on forests and the cost of settlement of people dependent on forest should also be added as the cost of forest diversion in addition to the standard project cost which would have been incurred by the user agencies without involvement of forest land while conducting the cost benefit analysis of the project. Similarly the benefits from the project accruing due to diversion of forest land and used in the project should also be accounted for in the benefits component in addition to the standard benefits of the project which would have been accrued without involvement of forest land while conducting the cost benefit analysis and determining the benefit and cost ratio (BC ratio).
- (iii) The cost of Compensatory afforestation and its maintenance in future and soil & moisture conservation at present discounted value and future benefits from such compensatory forestation accruing over next 50 years monetized and discounted to the present value should be included as cost and benefits respectively of compensatory afforestation while conducting the cost benefit analysis and determining the benefit and cost ratio ( BC ratio).
- (iv) **Table A** list the details the types of projects involving forest land for which cost benefit analysis will be required, **Table-B** Lists the parameters according to which the cost aspect of forest land diverted for the development projects will be determined, while **Table C** lists the parameters for assessing the benefits accruing to the project using forest land.

**COST BENEFITS ANALYSIS IN ACCORDANCE WITH  
GOI FC GUIDLINES NO 7- 69/2011-FC DATED 01-08-2017**

(v) A cost benefits analysis as above should be accompany the proposals sent to central Government for forest clearance under the Forest Conservation Act.

**Table A: Cases under which a Cost -benefit analysis for forest diversion are required**

Sl	Nature of Proposal	Applicable/Not Applicable	Remarks
1	All Categories of proposal involving forest land upto 20 hectares in plains and upto 5 hectares in hills	Not Applicable	These proposals may be considered a case to case basis and value judgments.
2	Proposed for defense installation purpose and oil prospecting only	Not Applicable	In view of national priority accorded to these sectors, the proposal would be critically assessed to help ascertain that the utmost minimum forest land is diverted for non forest use
3	Habitation, establishment of industrial units, tourist lodge complex and other building construction	Not Applicable	These activities being detrimental in protection and conservation of proposals would be rarely entertained.
4	All other proposal involving forest land more than 20 hectares in plain and more than 5 hectares in hills including roads, transmission line, minor, medium and major irrigation projects, hydro projects, mining activity, railway line, location specific installations like microwave stations, auto repeater centres, TV tower etc.	Not Applicable	These are cases where a cost benefit analysis is necessary to determine when diverting the forest land to non forest use in the overall public interest.
