NOTES :-

Heights are in metres and above Indian mean sea level.
Contours are approximate.
A relative heights, e.g., *8;* represents the approximate height, in metres, between the top and bottom of a steep slope.
The kilometre stone numbers along roads, railways and canals are shown in slant type, e.g., *' 5'* whereas milestone numbers are shown in upright type, e.g., ' 5'.
The triangulated & traverse heights and contours in this sheet, have not been adjusted to the heights of the spirit-levelled bench-marks and may not be strictly in accordance with them.
Cart-tracks and unmetalled roads in this sheet are generally motorable in dry season. Permission to use those along canals is required from the Irrigation authorities.
The area adjoining the Ganga River is liable to change owing to continual fluctuation in the course of the river.
Tanks, shown dry in this area, usually contain water from July to December.
The district and tahsīl boundaries in the Ganga and Yamuna Rivers follow the main deep water channels and will change with the fluctuations of these channels.
Forest names and their boundaries have not been shown for want of reliable information.
