NOTES :-
Heights are in metres and above Indian mean sea level.
Contours are approximate.
A relative height, e.g., 100', represents the approximate height, in metres, between the top and bottom of a steep slope.
The reverse heights and contours in this sheet have not been adjusted to the heights of the spot levelled bench marks and may not be strictly in accordance with them.
The kilometre scale numbers along roads, railways and canals are shown in plain type, e.g., 10, whereas milestone numbers are shown in upright type, e.g., 10.
Cart tracks and unmetalled roads in this sheet are generally not visible in dry season. Permission to use tracks along canals is required from the irrigation authorities.
Tanks shown dry in this sheet, usually contain water from July to December.
A relative height, e.g., 10', marked along a canal, indicates the height of the top of the canal embankment above the adjacent country.
Wells are numerous throughout the sheet; only the important ones have been shown.
