NOTES

Heights are in metres and above Indian mean sea level.
Contours are approximate.
A relative height, e.g., 8, represents the approximate height, in metres, between the top and bottom of a steep slope.
The kilometre stone numbers along the railway, roads and canals are shown in slant type, e.g., 5, whereas kilometre numbers are shown in upright type, e.g., 30.
Cart-tracks on unmetalled roads in this sheet are generally motorable in dry season. Permission to use those along canals is required from the irrigation authorities.
The traverse heights and contours in this sheet have not been adjusted to the heights of the spirit-levelled bench-marks and may not be strictly in accordance with them.
A relative height, e.g., 8, marked along a canal, indicates the height of the top of the canal embankment above the adjacent country.
