

(FOR COMPENSATORY PLANTATION) Mathura Division

SECOND EDITION

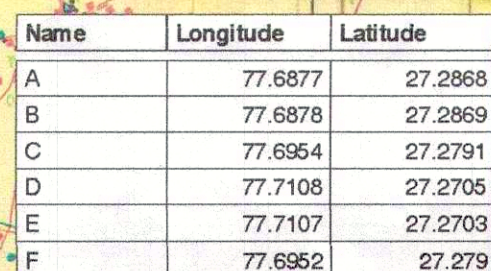

SHEET 54 E/II SECOND EDITION

Surveyed 1985-86

RĀJASTHĀN, UTTAR PRADESH

Magnetic Variation from True North about $\frac{1}{4}^{\circ}$ East in 1990.
(Increasing by about $2''$ annually).

No. 54 E

1:50,000

HEIGHTS & CONTOURS IN METRES

Water features are shown in blue where they generally contain water. Cultivated areas are coloured yellow. The exterior boundaries of areas of Reserved or Protected Forests are shown by green ribands.

Contours are approximate.
A relative height, δr , represents the approximate height, in metres, between the top and bottom of a steep slope.
Wooded areas are coloured green. Scattered trees and other vegetation are in green, but prominent surveyed trees are in black.

The kilometre route numbers along roads, railways and canals are shown in start type code, 'S' whereas distances numbers are shown in upright type, 'km'.

Unmetalled roads and cart-roads in this sheet are generally motorable in dry season. Permission to use those along canals is required from the Irrigation authorities.

A relative height, e.g., 6m, marked along a canal, indicates the height of the top of the canal embankment above the adjacent country.

The exact boundary in the *Tamara* river follows the main deep channel and will change with the fluctuations of that channel.

Wells and water wells are numerous throughout the sheet; only the important ones have been shown.

Tanks, shown in this area usually contain water from July to February.

This sheet has been compiled from 125,000 survey.
