Annexure No-

**COMPLIANCE OF THE OBSERVATIONS OF THE DIVISIONAL FOREST OFFICER, KEONJHAR
DURING HIS INSPECTION TO THE MINES ON 03.05.2016, WITH RESPECT TO THE LAND USE**

Sl. No.	Observations	Compliance
1	Area used for sub grade ore stack yard is more than the approved area for the purpose.	During the last years, the generation of sub-grade ore was more which could not be marketed. Therefore, aiming the future utilization of sub-grade ore in beneficiation plant and sale of these sub-grade ore, these have been stacked temporarily within the diverted forest land, inside the mining pits. After sale, these areas will be vacated.
2	Crusher has been installed within the area approved for ore stacking and dressing whereas no specific approval for crusher is there.	To meet the size specification of the indigenous steel plants and for dressing purpose of the ore, we preferred installation of a crushing plant for easy and rapid sizing of ore within the approved diverted forest land earmarked for ore stacking and dressing. This is also temporary in nature and will be dismantled at the end of lease period.
3	An area of 0.900 ha has been utilized for beneficiation plant for which approval was not there.	The total earmarked area for the purpose of beneficiation plant was proposed to be located within the non-forest land of the lease for which necessary environment clearance from MOEF has been obtained. During the construction and requirement of its establishment considering the ground reality, although the maximum portion has been established in non-forest land but some portion extended towards the forest land comprising 0.900 ha.
