

Project Detail:- C/O road from jangeshu to Auda via Bhanet (Km 0/00 to 3/500) within the jurisdiction of solan and kuniyar Forest Division, District Solan Himachal Pradesh

Query Point No. 7 (ii)

The alignment of the proposed road has been finalised after a detailed and extensive survey in the field. During the site inspection all the possibility were worked out and all the plus and minus were discussed and it was concluded that the finalized proposal is the best one as it has the following advantage over the others.

1. The road has been planned almost on the uniform levelled gradient.
2. Along the finalized alignment the cutting heights are very reasonable in maximum length along the proposed road. That means the debris generated in cutting will be less, and therefore the damage to the forest while disposing the excavated earth shall also be the bare minimum. Also the number of trees in the Proposed alignment is the least and in comparison to the other alignment.
