

Name of Proposal: Up gradation of road in front of ACL Factory situated at Bir-Plassi in Tehsil Nalagarh , Kms 0/00 to 2/300

File no: FP/HP/Road/114837/2020

Check List No Sr. No – 9

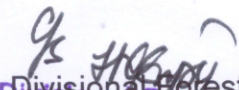

Justification of locating the Project on Forest Land

A kacha road exists from ACL Factory to Bir Plassi village constructed on forest land during 2006-2007. This existing road is proposed to be upgraded. Length of the existing road is 2.30 Km having 5 meter width. The proposed site is surrounded by 8 villages and 11 medium and small Industrial units. Width of existing road is not sufficient enough to ply the heavy vehicles. In addition to local public, road is useful for industrial units located in the area. 1.15 hectare forest land is already broken and 0.46 hectare more forest land shall be broken while upgrading the existing road. This road has been proposed to be constructed on forest land as no other suitable non forest land is available. Further all the government waste land in district Solan falls under the category of degraded forest land as per the 1952 notification. Proposal involves 1.61 hectare of forest land and felling of 11 number of trees.

The land proposed for diversion is unavoidable and is barest minimum.
