Justification for the purpose of the proposed quarry.

Justification for usage of Forest Land for the Proposed Building Stone Quarry site by Rajesh R. Naik, in Forest Survey No. 215/A/1A, in Arav village in Taluka Karwar of Uttar Kannada District. The above said Building Stone Quarry site comes in Minor Forest. The proposed Building Stone Quarry site is within the radius of 500 meters of Safer Zone, which is declared by the Task Force Committee of Uttar Kannada District. Human habitat, Archaeological site, Temple and Cultivated land, are not in the vicinity of Quarry site. It is also away from Wild Life sanctuaries. And the presence of large quantity of Building stone material (Granite Genesis) is available at the proposed location as per the report of Department of Mines and Geology, Karwar. The raw material extracted from this proposed Quarry is going to be utilized for the following purposes,

- i. In Karwar Taluka most of the land is marshy and sandy. The Quarry material mentioned is the basic necessity for the local people for the construction of their houses as this material is important for the construction of the foundation and pillars.
- ii. This material is also essential for the development of the local infrastructure such as Public roads, Government buildings, Temples, etc.
- iii. This material is also a very important necessity as Karwar taluka has a wide Coastal line which is vulnerable to Soil Erosion and to prevent this the said material is very important for the safety of the local people and their property.
- iv. As there are multiple National Projects coming up in and around Karwar taluka, the above said building material is a necessity for the construction.

As we currently do not own or operate any Stone Crusher the extracted material will be solemnly supplied to the local public and the Crushing Industry present in the Safer zone of the District. As there is acute shortage of raw material and due to which the local public have to bear the high costing of the material we intend to supply the extracted material so that it will be a big help to them.

For Sai Ram Enterprises,

Rajesh R Naik.
