Irrigation and Water Resources Department, Haryana, Panchkula.

---

**Minutes of 50<sup>th</sup> meeting of Haryana State Drought Relief & Flood Control Board (HSDR&FCB) held on 15.01.2019 under the Chairmanship of Hon'ble Chief Minister, Haryana.**

The list of participants is at **Annexure A.**

The Additional Chief Secretary, Revenue & Disaster Management Department, Haryana welcomed the Hon'ble Chief Minister, Hon'ble Finance minister, Haryana, and senior officers in the meeting. All Divisional Commissioners, Deputy Commissioners and Senior officers of I&WRD & PHED, who had joined in the meeting through video conference, were also welcomed.

ACS, Revenue apprised the Board about the discussions held in 48<sup>th</sup> meeting of Haryana State Technical Advisory Committee (HSTAC) held on 15.01.2019 in the forenoon session. It was brought out that all the new schemes (except that of Jind Distt.) proposed for approval of the Board were discussed in detail. She further told that 10 new schemes and 2 schemes of distt. Yamunanagar with revised scope on the request of respective Deputy Commissioners were also considered by HSTAC and same were circulated as recommendation of HSTAC as supplementary agenda for consideration and approval of Board. (Supplementary agenda annexed as **Annexure -B**).

The Principal Secretary (Irrigation & Water Resources Department) welcomed the Chairman and all the participants and further gave a brief account of the flood situation during 2018. The PS/I&WRD also informed about the efficiency and benefits of the flood protection works executed in previous years. The Engineer in Chief and Chief Engineer/LCU, IWRD briefed about the success stories of dewatering and land reclamation after the execution of schemes in village Dighal in District Jhajjar, Villages Shakkerpura and Singwa in District Hisar and he further stated that based on the past experiences this year similar new dewatering schemes are proposed in villages Dighal and Kondrawali.

Thereafter, discussions/deliberations on the agenda items were held. The record of discussions and decisions are brought out as under:-

**Item No. 1:** No comments were received from any quarter. The minutes of 49<sup>th</sup> meeting of HSDR&FCB held on 19.03.2018 were confirmed.

**Item No.2:** Action Taken Report (ATR) was noted. Regarding Sr. no. 1 of (ATR), it was apprised that work of 117 schemes has been completed whereas work on 57

schemes are under progress. Furthermore, this year 15 schemes have been proposed to be dropped due to non- availability of land and other technical issues. The Hon'ble Chief Minister asked the district administration to create awareness among farmers/public regarding the benefits of the schemes and the land holders must be encouraged to provide their land voluntarily at collector's rate. He further desired that land holders should not hesitate in giving their land for flood protection works at collector rate.

On Sr. no. 2 regarding balance payment from Urban Local Bodies for the deposit work of remodeling of Panipat Drain from Rd 55673 to 64400 (Phase-II) with estimated cost of Rs 13.55 Crore, the Principal Secretary, ULB agreed to provide the funds at the earliest.

On Sr. no. 3 regarding exploring the alternatives to reuse the water and not just throwing into drain, it was informed that I&WRD has planned schemes for reutilization of flood water in districts Jhajjar and Panipat in association with Haryana State Pollution Control Board .

On Sr. no. 4 regarding preparations to face serious Heat Wave conditions in Year 2018; the ACS, Revenue stated that due to well-coordinated efforts with I&WRD & PHED no causality or major damage occurred due to Heat wave in the State and no drought conditions were reported last year.

On Sr. no. 5 regarding checking the quality of water before injecting into the ground water recharge or bore wells, it was brought out that required instructions were circulated to all concerned officers to ensure its compliance.

On Sr. no. 6 regarding monitoring the flood protection schemes by the District Administration; the instructions regarding same were given to all concerned and the committee was constituted to check the flood protection works.

**Item No. 3:** Flood report of Haryana for the year 2018 was noted. The PS/I&WRD pointed out that despite the fact that the State experienced 10.10 % deficit rain fall during monsoon 2018, some districts have still faced water logging problem due to accumulation of rain water in low laying fields & abadi area during the unprecedented rainfall of 22-23-24 September, 2018. The heavy rains during this period flooded about 2,30,000 acres, resulting in damage of crops. However, well-coordinated efforts of officers of I.W.R.D with Distt. Administration, the

dewatering of fields were carried out efficiently. PS/ I&WRD further apprised that additional 245 pumps have been procured during 2018 and same were utilized for draining out the flood water in low lying areas timely and efficiently. Further procurement of some additional pumps has been proposed in this year also. Apart from this river Yamuna received more than 6 lac cusecs of discharge which passed safely; however erosion of banks at few places along river were reported. It was desired that district administration shall clear the bills of private operators engaged for dewatering of fields at the earliest after arranging the funds from Revenue Department. The Position of pumps and new inventory that was added this year with IWRD were also discussed. The Chief Minister directed to compile and prepare a consolidated list of all inventories available with all departments in Haryana and the compiled information may be circulated to all concerned departments, for utilizing the same in case of occurrence of flood like situation anywhere in state. As regard to payment of compensation (Kharaba) to farmers, ACS Revenue informed that all the Deputy Commissioners have been directed to complete survey associated with District Agricultural Officers within three days and send the report to H.Q at the earliest. Further compensation to farmers shall be disbursed in association with agriculture department.

**Item No. 4:** PS/I&WRD informed that HSTAC has recommended 153 schemes costing Rs. 152.77 Cr (cost later increased to Rs. 154.17 Crore) including supplementary schemes as circulated as **Annexure-B** for approval of the Board. The Chief Minister, Haryana directed that schemes pertaining to flood protection and drainage works only be proposed to the Board. The 12 schemes of District Jind were not discussed due to imposition of model code of conduct by Election Commission and the decision regarding the same shall be taken separately. The Board authorized the Chairman to consider the approval of schemes of Jind District on file after completion of election process in District Jind.

The Chairman of the Board desired to know the actual reason behind lakhs of acre of land becoming unfit for agricultural purpose in Ellenabad in District Sirsa, The Deputy Commissioner Sirsa explained that this problem has occurred due to the rise in Ground Water Table in that region. The Addl. Chief Secretary, Agriculture added that to know the root cause and solution thereof, the manual mapping of the area has been done and the work to digitalize the same is in

progress. However, a comprehensive solution in consultation with the experts shall also be proposed very soon.

The Deputy Commissioner Bhiwani pointed out that 02 schemes are proposed to be dropped as the land owners refused to provide their land for execution of flood protection scheme. The Chairman directed that merely dropping the schemes should not be the intention but the affected people must also be persuaded to provide their land where urgent flood protection schemes are required or otherwise the officers must provide an alternative solution to overcome the existing problem.

The Finance Minister also pointed out that district administration must ensure that the culverts on National Highway should never be blocked, rather any obstruction to the flow of water must be removed immediately.

The Deputy Commissioner Yamunanagar briefed to the Chairman that high flood discharge was received in river Yamuna in 2018 which affected various villages along river Yamuna. The agendas to protect these villages have been incorporated in this year's proposals. However due to paucity of funds, the scheme proposed in the agenda to protect village Odri is inadequate; and the Board was requested to allow to increase the scope of work in district Yamunanagar at Sr. no.142 page no. 55 of main agenda as mentioned below:-

*“Agenda for construction of 1855 ft stone steining & 06 stone studs for the protection of village Odri from River Yamuna amounting to **Rs. 195 Lacs** (against the initial cost Rs.55.03 Lacs)”*

Finally, after detailed deliberations, **153 schemes amounting to Rs. 154.17 Crore** were approved by the Board.

**Item No.5:** The Principal Secretary (I&WRD) briefed the Board regarding the status of on-going schemes which were approved during 49<sup>th</sup> meeting of Haryana State Drought Relief & Flood Control Board held on 19.03.2018. It was informed that a total of **111 schemes** with balance requirement of funds of **Rs.148.12 Crore** were discussed in the 48<sup>th</sup> meeting of HSTAC in the noon session and proposed to be carried forward for FY 2019-20 and thereafter. However, 15 schemes, approved in previous Board meetings were proposed to be dropped on account of unavailability of land and various administrative and technical reasons. Thence,

111 no. ongoing schemes with balance requirement of Rs. 216.34 Cr. for the next 03 financial years were also noted by the Board for continuation.

**Item No.6:** The PS/(I&WRD) informed the Board that 07 schemes approved in previous Board meetings under Deposit Head could not be taken up as the balance amount of Rs 79.84 Cr. is still pending with Haryana Urban Development Authority (HUDA) now HSVP, Municipal Corporation Panipat, Municipal Corporation Faridabad and HSIIDC. The Principal Secretary, Town and Country Planning expressed his inability to provide the funds in view of the financial constraints of the Authority. However, during the last meeting it was decided that Irrigation & Water resources Department may clear the liability of contractors to avoid litigation. The I&WRD had cleared the liability from its own resources after approval from Hon'ble Chief Minister, Haryana, but the pending funds are yet to be deposited by the departments to reconcile the accounts to avoid any audit objection. The PS/Town & Country Planning and PS, Urban Local Bodies agreed to clear the current liability at the earliest.

**Item No. 7:** It was informed by Principal Secretary (I&WRD) that during the FY 2018-19, Finance Department had allocated Rs 120.00 Crore in original budget estimate and out of that, Rs. 66.00 Crore has already been spent so far on various flood protection schemes. Further, the total requirement of budget for the financial year 2019-20 is as under:-

<b>Sr. No.</b>	<b>Schemes</b>	<b>Amount required during 2019-20 (Rs. in Cr.)</b>
1.	New schemes (153)	154.17
2.	Ongoing schemes (111)	148.11
	<b>Total</b>	<b>309.48</b>

(\*12 new schemes amounting to Rs. 15.69 Cr. in Distt Jind shall be taken up Separately after the culmination of model code of conduct)

Accordingly ACS, Finance was requested to allocate additional budget under head 4711-Flood Control & Drainage, so that Department is able to complete the maximum number of schemes on priority basis during the Financial

Year 2019-20. The ACS, Finance brought out that allocation of budget of Rs. 309.48 Crore during Financial Year 2019-20 is subject to availability of funds. Initially, the budget of about Rs. 125.00 Cr. would be allocated for 2019-20. However, he assured that the requirement of additional funds, if any, will be reviewed at the time of supplementary budget as per performance of the department.

The PS/I&WRD requested that as per the previous practice, the works approved by the Board, should be exempted from taking administrative approval of individual works and the concerned officers shall be allowed to take up approved flood works immediately without any further delay.

After deliberations, it was decided that I&WRD & PHED may start the works immediately as approval of the Board is *de facto* administrative approval. However regarding technical sanction of individual works, the same may be taken from the respective competent authorities, as the case may be.

**Item No.8:** The Principal Secretary, Public Health Engineering Department briefed about the Status of Schemes completed during 2018-19, on going schemes and funds required to complete the ongoing works during 2019-20. Out of total 36 schemes approved, 13 schemes were completed during 2018-19 and 23 schemes were reported as in progress. To complete these 23 ongoing schemes, funds to the tune of Rs.2000.00 lacs are required during 2019-20.

The Board approved the proposal of Public Health Engineering Department.

#### **Additional Discussions:-**

1. The Chairman of the Board, Hon'ble Chief Minister also directed the Irrigation and Water Resources Department to start the internal clearance and desilting of drains well before the monsoon and district administration shall provide MNREGA labour to the department for clearance of drains timely. I&WRD shall utilize the maximum funds available under MNREGA for clearance of drains and canals. District Administration and Irrigation Department shall certify that all the drains have been cleared as per

requirement before 15<sup>th</sup> May 2019 to the Revenue and Irrigation Department respectively.

2. The Chairman of the Board mentioned that the schemes for construction of new bridges on rivers/rivulets must be taken up separately by the PWD (B&R) or Marketing Board as the case may be, and that such schemes should not be proposed before the HSDR&FCB.

The Hon'ble Chief Minister directed all the Deputy Commissioners to monitor the flood protection schemes, their effectiveness and ensure reliability and quality of works executed. The meeting was concluded with the message from Chairman to all members that "*Hope for best but prepare for the worst*".

The meeting ended with a vote of thanks to the Chair.
