	The KML file uploaded by applicant, the toposheet, and the geo referenced map does not tally with one another. Also the toposheet uploaded is not original therefore it becomes unclear while zooming. Marked every point of toposheet also. As per KML the forest area shown is many places touching the buildings which might be encroachments. In many places as per KML, the proposed line is not catering any house road but it is left in the forest area. Also in area calculation show each and every point being touched by the pipeline and the area of that portion. Applicant has not given area in detail branch wise.	Correction has been done.
