Scale: 1:50,000

HEIGHTS & CONTOURS IN METRES
CONTOUR INTERVAL 20 METRES

Water features are shown in blue where they generally contain water. Cultivated areas are coloured yellow. The exterior boundaries of areas of Reserved or Protected Forests are shown by green ribbons.

Contours are approximate. A relative height, dr., represents the approximate height, in metres, between the top and bottom of a steep slope. Wooded areas are coloured green. Scattered trees and other vegetation are in green, but prominent surveyed trees are in black.

Plots or temporarily cultivated areas occur throughout the jungle; they are normally abandoned after 2-3 years and are not shown. The kilometre scale numbers along roads and railways are shown in stout type, e.g., '2' whereas milestone numbers are shown in upright type, e.g., '5'.

All unmetalled roads inside the Tea Gardens are motorable throughout the year. Permission to use these roads is required from the Tea Garden authorities.

The major protective embankments in the area, on which roads have not been shown, can also take limited wheeled traffic. Permission to take vehicles along these embankments is required from the Embankment and Drainage Branch (P.W.D.) authorities.

Beating trees are shown thus:

The alignment of Dayang R.F. boundary and the eastern boundary of Nambor Reserved Forest have been entered as supplied by the Chief Conservator of Forests Assam, but have not been verified.
