

**CERTIFICATE REGARDING SUITABILITY OF AREA IDENTIFIED FOR
COMPENSATORY AFFORESTATION (CA) AND ANR FROM MANAGEMENT
POINT OF VIEW**

No suitable non-forest land is available for taking up compensatory afforestation under Noney Forest Division, Noney. As such, suitable degraded forest land have identified at one patch under the Division as shown below:

Sl.No.	Division	Name of village/ plantation site	Area (Ha)	Compt. No.
1.	Noney Forest Division, Noney	Kambiron	16.2	28
	Total		16.2	

The forest type of the area falls under sub-Tropical semi-Evergreen and moist deciduous Forest. Tree species such as *Litsea spp*, *Schima wallichii*, *Quercus serreta*, *Erythrina indica*, *Bombex ceiba* are found in these areas. As such, tree species namely *Gmelina arborea*, *Terminalia myricarpa*, *Michelia champaca*, *Artocarpus chaplasha*, *Quercus serreta* *Melocanna Baccifera etc*, will be suited for plantation in the areas.

The indentified CA site can be managed effectively because of its proximity to the village. Hence, the area identified is best suited for taking up of Compensatory Afforestation(CA) and ANR.
