

CERTIFICATE

This is to certify that the site for Compensatory Afforestation selected by the User Agency is of sufficient area and the site is suitable for carrying out 170 saplings plantation in gaps as per the requirement in lieu of felling of 17 numbers of trees for the construction of FOB at Qutub Metro station.

The area is already fenced but the fencing would be required to be strengthened to accord protection from grazing and encroachment. Since there are already 38 grown up trees with bushes and champa plants in the earmarked CP area so the area would be required to be opened up by crown thinning once the compensatory plantation seedlings grow up.
