### JOINT INSPECTION REPORT

Joint inspection of site for diversion of Land construction of Link road from Bhadhawli Petrol Pump to Bishkulti Nehar Km. 0/00 to 0/345 was done on 28-03-2014 by the committee consisting of undersigned officers. This road is being constructed by HPPWD to connect the above villages. The villages has a population of about 400 souls. The area has a potential to produce good crops of Apple, Almonds, Potatoes and other cereals crops, the transportation of which to the markets is a major problem for the local inhabitants in the absence of a road link. Moreover, in case of medical emergencies the absence of road link poses a major problem for evacuations of patients especially in view of the steep and rugged terrain.

Bhadhawli Petrol Pump to Bishkulti Nehar road are remote area hitherto unconnected by road. The villagers have to take long journey to reach their villages. It is also very problematic for the villagers to transport essential commodities to the village in the absence of a road link especially in view of the rugged terrain and steep slopes. It is also the policy of the government to connect all Panchayats by road. Hence road connection to the above villages has been mooted by constructing a road from T.K. H. road. Whole portion of this road will pass through forest land. The total length of the road is 0.345 which will pass through the forest land. There is no private land in and around the proposed alignment therefore keeping in view the ground realities the alignment was finalized in the forest land.

Three alternatives which were technically feasible were explored. Since all the beneficiary villages are surrounded by forests hence both the alignments have to necessarily pass through forest area if the primary objective of linking the villages to the motor road is to be achieved. Hence there is no escape from using the forestland. Three alignments were examined. In the first alignment nil trees of different species are required to be felled 0-20-71 ha (0-19-72) ha for construction of road and 0-00-99 ha of forest land for dumping sites) is required to be diverted. In the second alignment nil trees of different spp. are required to be felled and also involve 0-50-10 ha of forest land. Third alignment nil trees of different spp. are required to be felled and also involved 0-60-20 ha forest land. Therefore, keeping in view the lesser felling of trees and minimum use of forest land the alignment No. 1 is finalized for construction of this road. The forest land coming in the first alignment is the minimum and cannot be avoided.

The joint inspection committee therefore recommends that the forest land measuring 0-20-71 coming in alignment No. 1 as per Khasra number wise detail given in Checklist No. 6 of the proposal be diverted under Forest conservation Act, 1980 for construction of this road.
