Clarification Note

The Project "Filling up of 35 Tanks in Yadgir District" is Karnataka State Government Project, executed by KBJNL which aims at filling 35 direct and 20 indirect tanks.

- The primary purpose of the project is to ensure that this part of dry region which is of late suffering from scanty rainfall which leads to drought like situation as we come towards end of summer season is avoided to some extent.
- Source of water is from Bhima River Yadgir. Pumping is 150 days in a year in Monsoon season which will prevent the floods in the upstream.
- Most of the tanks situated near forest land will result in availability of drinking water for wild & Domestic animals in summer season.
- Increment in ground water table result in recharge of local bore wells.
- Drinking water availability in tanks for domestic and wild animals apart from local villagers usage.
- Tank is the source for RDWSD (Drinking water) project. It also enhances the source (water) in existing RDWSD project.

Considering above points the project serves both the purposes, primarily **Drinking water** (for livestock), also will add to **Irrigation** sustenance in the areas of the beneficiary tanks.

Yours faithfully,

Executive Engineer,
KBJNL, Sonthi L.I.Division,
Khanapur Camp
