

#### COST BENEFIT ANALYSIS FOR FOREST LAND DIVERSION (Ref: MoEF guideline No. 7-69/2011-FC (Pt.) dtd. 0f<sup>+</sup> Aug, 2017)

Project:- Diversion of 29.14 Ha of forest land for construction of 33kV S/C Distribution line from Yachuli-Hapoli under Comprehensive Scheme project of Arunachal Pradesh.

Table-A:- Cases under which a cost-benifit analysis for forest diversion are required

No	Nature of Proposal	Applicable/Not applicable	Remarks
.1	All categories of proposal involving forest land upto 20 hectares in plains and upto 5 hactres in hills	Not applicable	
2	Proposal for defence installation purpose and oil prospecting(Prospecting only)	Not applicable	
3	Habitation, establishment of industrial units, tourist lodge complex and other building construction.	Not applicable	
4	All other proposals involving forest land more than 20 hectares in plains and more than 5 hactres in hills including roads, Distribution lines, minor, medium and major irrigation projects, hydro projects, mining activity, railway lines, location specific installations like micro-wave stations	Applicable	These are case where a cost benifit analysis is necessary to determine when diverting the forest land to non-forest use in the overall
	specific installations like micro-wave stations, auto repeater centres, TV Towers etc.		public interest.

## Table-B: Estimation of cost of forest diversion

SN	Parameter	Remarks	Monetary equivalent
	Ecosystem services losses due to proposed forest diversion	Economic value of loss of eco-system services due to diversion of forests shall be the net present value (NPV) of the forest land being diverted as prescribed by the Central Government (MoEF & CC). <i>Note:</i> In case of National Parks the NPV shall be ten (10) times the normal NPV and in case of Wildlife Sanctuary the NPV shall be five (5) times the normal NPV or otherwise prescribed by the ministry or any other competent authority	NPV for the diverted forest area considered as <i>Rs. 9.39</i> Lakhs/Ha. Total value of NPV in Rs. =(9.39 Lakhs x 29.14 ha) 273.62 Lakhs
2	Loss of animal husbandry productivity, including loss of fodder	To be quantified and expressed in monetary terms or 10% of NPV applicable whichever is maximum	NIL. As the proposed project is an overhe Distribution line, there will be no loss animal husbandry productivity includi loss of fodder. After completion tower erection and stringing, natur vegetation/plantation of dwarf speci will cover up the areas which we temporarily damaged durin construction.
3	Cost of human resettlement	To be quantified and expressed in monetary terms as per approved R&R plan	NIL. There is no human resettlement issue this project. Hence no cost involved f any R & R scheme.
4	Loss of public facilities and administrative infrastructure (Roads, building, schools, dispensaries, electric lines, railways, etc.) on forest land, which would require forest land if these facilities were diverted due to the project.	To be quantified and expressed in monetary terms on actual cost basis at the time of diversion	NIL There is no requirement of an diversion of public facilities ar administrative infrastructure (Road building, schools, dispensaries, electr lines, railways, etc.) under th Distribution line project.
	Criste Touriso Paullo foiste Paullo foiste		Executive Engineer (E) Zino Incertical Division, Department of Power,Ziro Govt. of Arunachal Pradesh

		Era Bra OCV	Executive Engineer (E) Ziro Electrical Division, Department of Power,Ziro Govt. of Arunachal Pradesh
		TOTAL cost of forest diversion	(273.62 + 82.08 + 136.81 + 203.98 lakhs = <b>696.49</b> lakhs
8	Compensatory afforestation and soil and moisture conservation cost	The actual cost of compensatory afforestation and soil & moisture conservation and its maintenance in future at present discounted value	Cost of CA is considered as = 3.5 Lakh per ha. Total CA Cost <i>(in double degraded land)</i> = (3.5 x 29.14ha x 2) = <b>203.98</b> Lakhs.
7	Habitat Fragmentation Cost	two years had he not been shifted. While the relationship between fragmentation and forest goods and services is complex, for the sake of simplicity the cost due to fragmentation has been pegged at 50% of NPV applicable as a thumb rule	Considered as 50% of NPV i.e. Rs. <b>136.81</b> Lakhs
6	Cost of suffering to oustees	The social cost of rehabilitation of oustees (in addition to the cost likely to be incurred in providing residence, occupation and social services as per R&R plan) be worked out as 1.5 times of what oustees should have earned in	Not applicable for this project sind there is no resettlement involved.
5	Possession value of forest land diverted	30% of environmental costs (NPV) due to loss of forests or circle rate of adjoining area in the district should be added as a cost component as possession value of forest land whichever is maximum	The possession value of forest land diverted is calculated as Rs. 82.08 Lakhs. (30% of NPV) However, in case of Distribution lin projects, possession of diverted fore land is not completely required by th User Agency after completion of th project & during operation ar maintenance (O &M) stage. As p existing MoEF guideline, dwarf specie plantation will be undertaken below th Distribution line corridor (RoW) th Forest Department. Only looping - pruning of tree branches near th electric conductor will be required during the maintenance period of th project

# Table-C- Existing guidelines for estimating benefits of forest-diversion in CBA

Sr. No.	Parameters	Remarks	Monetary equivalent
1	Increase in productively attribute to the specific project	To be quantified & expressed in monetary terms avoiding double counting	Socio economy development & industrial growth, power for irrigation, telecommunication facility and distribution of grid power to rural households will have major to the socio-economy of the state. The lump sum monetary equivalent of the above benefit is considered as <b>Rs. 50 lakhs</b>
2	Benefits to economy due to the specific project	The incremental economic benefit in monetary terms due to the activities attributed to the specific project	The monetary return of the specific Distribution project is calculated as below:- Capacity of the line loading = 11000 KW Cost of Power <i>(assume an average value)</i> = Rs.3.90 per KWH Monetary return of the Project for 50 (Fifty) years =(11,000 x24 x30 x12 x50 x 3.9) = Rs. 18532800000 = <b>Rs. 18532.80 lakhs</b> .
3	No. of population benefited due to specific project	As per the Detailed project report	Entire population of Yachuli-Hapoli and also the surrounding areas will be benefited by the said 33 kV S/C Yachuli-Hapoli Distribution Line. The said line connectivity will help the rapidly developing Yachuli and Hapoli area by providing uninterrupted power supply for small and large scale business establishments which will improve the socio economy development of the area. The lump sum monetary equivalent of the benefit is considered as <b>50 lakhs</b>

Ziro Dectrical Division, Department of Power, Ziro Govt. of Arunachal Pradesh

4	Economic benefits due to direct and indirect employment due to the project	As per the Detailed project report	Temporary labour engagement (appx 60 nos per day) during execution of the project along with various firms/suppliers/manufacturers will be engaged for a period of four (4) years. Permanent employment for 15(fifteen) nos. will be also be generated. The lump sum monetary equivalent of the direct and indirect employment generation is calculated as 450 lakhs
5	Economic benefits due to Compensatory afforestation	Benefits from such compensatory forestation accruing over next 50 years monetized and discounted to the present value should be included as benefits of compensatory afforestation. *For benefits of CA the guideline of the Ministry for NPV estimation may be consulted	Benefits from compensatory forestation accruing over next 50 years is huge and monetary equivalent is considered as Rs. 50 lakhs
	Total benefit of the project (monetary equivalent)		= (50 + 18532.80 + 50 + 450 + 50)  lakh = <b>19132.80 lakhs</b>

#### BENEFIT

Cost Benefit Ratio (CBA Ratio) = COST
