

UNDER TAKING REGARDING TO REDUCE THE NUMBER OF TREES.

It is certified that I/We Executive Engineer, Chowari Division, HPPWD Chowari have applied for diversion of 6.2455 hectare of forest land for the purpose of Construction of Link Road from Dadriara to Chakki (G.P. Jandrog) (5.6375 hectare for road construction and 0.6080 hectare for Dumping Sites). I/We hereby undertake that keeping in view the basic purpose of connecting all the beneficiary villages, three possible alignments for the construction of this road have been proposed by the user agency. All these alignments are shown on the topo-sheet enclosed with the proposal. The villages to be connected are surrounded by forest land on all sides. Hence it is not possible to avoid the forest land in any of the alignments. In the **alignment No. I** forest land involved for diversion is 5.6375 hectare and 617 numbers of trees will required to be felled. In the **alignment II** 6.6000 hectare of forest land is involved and 805 number of trees and (610 number of trees sapling) are required to be felled. Where as in the **alignment III** 7.6500 hectare of forest land and 925 trees and 725 number of trees sapling) are involved. Keeping in view the consideration of using minimum forest land with least felling of trees, it was decided to recommended **alignment No. 1** for the construction of this road as it involves lesser number of trees and also lesser forest land as compared to **alignment No. 2 and 3** under the circumstances felling of 617 number of trees and diversion of 5.6375 hectare of forest land as coming in the first alignment is the minimum requirement for construction of this road. The Joint Inspection Committee was also of the view that diversion of 5.6375 hectare of Forest Land and feeling of 617 number trees cannot be escaped.
