

Divi's Laboratories Limited

Justification Report for locating the Project in the Forest area

Due to the proximity of the proposed site to the sea, the travel time for sea water to the desalination plant is greatly reduced. The balance water from desalination should be set back to sea and proposed site will reduce the travel time of this process. The power requirement to pump the water, lying of pipelines and travel time of water is reduced drastically. Because of the non-availability of private lands in the surrounding area, the proposed project is located in the forest area, which is abutting the ocean.
