

Cost Benefit Analysis

The salient features of economic analysis of the project are as presented below;

1. It is envisaged that significant investments are anticipated from sectors such as Fabrication & Engineering, Chemicals, Pharma, Rubber & Plastics & Electrical and Electronics & IT which together will lead to growth in GDP.
2. The direct & indirect employment in the SEZ will result in increase in the purchasing/spending power of the people.
3. It is focused on attracting investments from top MNCs which would help in boosting private investment in Gopalpur SEZ.
4. The estimated project cost is INR 2500 crores and the projected investment expected by different investors is INR 15000 crores.
5. The SEZ will have substantial impact on various infrastructural facilities such as Railways, Airport, Sea Port and transport facilities within the state.
6. The development of the industrial park will benefit a population of around 10000 people.
7. The setting up of the SEZ is expected to provide a major boost to the state's multi-product sector by ensuring a fair share of export revenues and also by raising the living standard of workers.

The cost benefit analysis in the format prescribed in Annexure – VI (b) and VI(c) of Forest Conservation Act, 1980 guidelines shall be computed at the time of compilation of Part – II.
