FEASIBILITY REPORT FOR TRANSMISSION LINE

1. PROJECT HIGHLIGHTS

a) Project	Construction of 132 KV D/C Jagadhari (TSS)- Tapri (TSS) Transmission line associated with "Transmission Line Package TW 01 associated with Eastern Dedicated Freight under consultancy services to DFCCIL"
b) Location of Project	Haryana and Uttar Pradesh state in North India.
c) Beneficiary state	Haryana, Uttar Pradesh, Bihar, Uttarakhand, Punjab etc. (All state associated with EDFCCIL corridor)
d) Project cost	26000 Lakh
e) Commissioning Schedule	June -2022

2. JUSTIFICATION

The Indian Railways' quadrilateral linking the four metropolitan cities of Delhi, Mumbai, Chennai and Howrah, commonly known as the Golden Quadrilateral; and its two diagonals (Delhi-Chennai and Mumbai-Howrah), adding up to a total route length of 10,122 km comprising of 16% of the route carried more than 52% of the passenger traffic and 58% of revenue earning freight traffic of Indian Railway. The existing trunk routes of Howrah-Delhi on the Eastern Corridor and Mumbai-Delhi on the Western Corridor were highly saturated, line capacity utilization varying between 115% to 150%. Railways lost the share in freight traffic from 83% in 1950-51 to 35% in 2011-12. Not only this, the National highways along these corridors comprising 0.5% of the road network carried almost 40% of the road freight.

The surging power needs requiring heavy coal movement, booming infrastructure construction and growing international trade led to the conception of the Dedicated Freight Corridors along the Eastern Western Routes, begin with. Recently, three new corridors namely East West, East Coast and North South sub corridor sanctioned for DPR preparation.

DFCCIL will decongest already saturated road network & promote shifting of freight transport to more efficient rail transport. This shift is expected to offer significant reduction of Green House Gas (GHG) emissions in transport sector in India. It is expected that DFC will save more than 450 million ton of CO₂ in first 30 years of operation (Assessment based on Ernst & Young study).

Dedicated Freight Corridor Corporation of India Limited (DFCCIL) is in the process of construction of EDFC i.e Eastern Dedicated Freight Corridor (Ludhiana- Dankuni) & WDFC i.e Western Dedicated Freight Corridor (Dadri-Mumbai) which are almost in

parallel to Indian Railway (IR) routes and will draw power from Railway's trunk transmission line for its traction load by creating necessary arrangements.

DFCCIL is in process of construction of 132 KV D/C transmission line and substations, so that railways may extend power supply to DFCCIL's Traction Substations (TSS) in the said freight corridors. In this connection, construction of **132 KV D/C Jagadhari (TSS)- Tapri TSS Transmission Line** is being executed in district Yamuna Nagar (Haryana) with route length of 16.42 km falling in Haryana state. This line is passing through 11 no. villages in Yamuna Nagar district of Haryana state and about 250 persons are benefited during construction of this line.

Transmission line is a linear project during survey of the transmission line, various possibilities were explored and all efforts have been made to minimize the forest stretches. The final alignment has been finalized in such a way that the minimum forest area will be required for implementation of the project. Further, transmission line projects are environment friendly and do not involve any disposal of solid effluents and hazardous substances on land, air or water.
