Sir,

In reference to above cited subject it is submitted that regarding realignment of road to save the conifer trees being cut down in the alignment, it is to state that the feasibility of realignment was already explored beyond km 8th but no other option of realignment is feasible as the target habitation to be connection is on higher contour passing through this stretch of forest land.

Besides this the point wise reply to the EDs is submitted as under: -

1. Total length of road = 10.00 Kms
2. Length of road constructed = 8.150 Kms
3. Remaining length to be constructed = 1.85 Kms
