**Point Wise Compliance Report of Forest Diversion Proposal No.:
FP/RJ/TRANS/142368/2021**

Sr No.	EDS Observation by Forest Department	Reply by User Agency
1.	The KML uploaded for forest boundary greatly differs from the KML uploaded by user agency. So the area desired for diversion is much different from the area needs to be diversion. So forest boundary should be verified by DCF first then only it will be checked thoroughly.	<ul style="list-style-type: none">➤ We have Proposed the 11 KV Transmission line along the existing road which was constructed after getting forest diversion approval from MoEF&CC and the existing forest diverted road which is 5 meter wide and length is 5.50 Km.➤ Again, we have verified the forest start & end points from ground as well as from SOI Toposheet, hence proposed 11 KV transmission line lengths in forest land is measured 5.50 km while as per forest department online uploaded KML file forest length is showing less.➤ We also hereby undertake that during Part-II processing we will verify the Proposed Forest land length during Joint Site Visit of Forest Department and User Agency.
