NOTES

Heights and Contours have not been shown.
A relative height, e.g., 100, represents the approximate height, in metres, between the top and bottom of a depression.
A relative height, e.g., 100, against a well, indicates its total depth in metres.
Transcription of the name of a place in the original language from July to September.
Most of the unlined well symbols indicate covered tanks called 'kunds', which usually contain surface collection of rainwater.
Collection is periodic and dependent on rainfall.
Pylons placed where there is arrangement for saving drinking water.
